Re: EPA Questions related to LDNR's Class VI Primacy Application

Dear Ms. Pham:

The Louisiana Department of Natural Resources (LDNR), Office of Conservation is submitting this package in response to questions from the U.S. EPA's Office of Water (OW) and Office of Enforcement and Compliance Assurance (OECA) regarding Louisiana's Class VI primacy application.

Yours truly,

Richard P. Ieyoub  
Commisioner of Conservation

A handwritten signature in blue ink, appearing to read "S. Lee".

Stephen H. Lee, Director  
Injection and Mining Division

## EPA Questions related to LDNR's Class VI Primacy Application

Background: We need to address the following questions related to LDNR's Class VI primacy application. The bullets under each question provide relevant background.

1. What is the applicable statute of limitations to commence a civil action for violations?
  - 28 U.S.C. § 2462; "Except as otherwise provided by Act of Congress, an action, suit or proceeding for the enforcement of any civil fine, penalty, or forfeiture, pecuniary or otherwise, shall not be entertained unless commenced within five years from the date when the claim first accrued if, within the same period, the offender or the property is found within the United States in order that proper service may be made thereon."

LDNR: Louisiana's civil enforcement authority for UIC is imprescriptible. Louisiana Constitution art. 12, section 13, states "Prescription shall not run against the state in any civil matter, unless otherwise provided in this constitution or expressly by law." Because there is no specific prescriptive period established in law for civil enforcement actions for Class VI (or any other UIC or Office of Conservation) requirements, civil prescription does not run against the State. This has been recently recognized by the Louisiana Supreme Court in the case State of Louisiana, ex rel. Tureau vs. BEPCO, et seq., 2021-C-00856 (La., October 21, 2022), wherein the Court determined that a citizen suit to enjoin activities alleged to violate the Commissioner of Conservation's regulations "is not subject to liberative prescription."

2. What is the applicable statute of limitations to commence a criminal action for violations?
  - 18 U.S.C. § 3282; "Except as otherwise expressly provided by law, no person shall be prosecuted, tried, or punished for any offense, not capital, unless the indictment is found, or the information is instituted within five years next after such offense shall have been committed."

LDNR: The statute of limitations for criminal prosecution under Louisiana law depends on the severity of the crime and the legally authorized level of punishment associated with it. For instance, La. C.Cr.P. Tit. XVII, art. 572, states in part,

"A. Except as provided in Articles 571 and 571.1, no person shall be prosecuted, tried, or punished for an offense not punishable by death or life imprisonment, unless the prosecution is instituted within the following periods of time after the offense has been committed:

(1) Six years, for a felony necessarily punishable by imprisonment at hard labor.

(2) Four years, for a felony not necessarily punishable by imprisonment at hard labor.

(3) Two years, for a misdemeanor punishable by a fine, or imprisonment, or both.

(4) Six months, for a misdemeanor punishable only by a fine or forfeiture."

The level of criminal punishment for violations of Class VI regulations would appear to depend on the specific criminal violation implicated. But it does appear that in some cases a statute of limitations as low as 4 or even 2 years may be possible.

Despite this difference, Louisiana's program remains as stringent as the federal Class VI program. Even when the two-year limitation is applicable to a criminal enforcement action, it is adequate to compel compliance with the State's Class VI program's regulations as has been EPA's determination for all of Louisiana's UIC program regulations to date.

The Department further commits to refer all criminal violations of its Class VI program to the appropriate district attorney or Attorney General to allow prosecution within the applicable statute of limitation.

Finally, if in rare circumstances criminal prosecution of a Class VI violation by the State is somehow determined to be outside an applicable statute of limitation, EPA's oversight and direct criminal enforcement authority would be unaffected. See 42 U.S.C. § 300h—2(a)-(b). This situation was previously recognized by EPA and Louisiana in Addendum 1 to section IV(c) of the MOA between the two. In such rare instances where a target for criminal prosecution possesses a valid defense at the State level not found at the federal level, Louisiana commits to work closely with EPA on any federal criminal prosecution.

3. Will/does the State Director make available information on reporting procedures for the public to submit information about violations?
  - As stated in your MOA Addendum 1, Sec. III.E. (p. 5) and Program Description, Sec. 5 (pp. 8-9) "The LDNR shall provide the opportunity for the public to submit information on violations and shall have procedures for receiving, investigating, and ensuring proper consideration of the information."
  - The state's compliance monitoring program includes the following activities: [...] Investigating complaints alleging improper construction, completion, operation or maintenance of a GS project.
  - 40 CFR 145.12 (b)(4) The State shall maintain: "Procedures for receiving and ensuring proper consideration of information submitted by the public about violations. Public effort in reporting violations shall be encouraged and the State Director shall make available information on reporting procedures"

LDNR: Please see the attached Policy No. IMD-GS-12 and UIC Incident Report. Policy No. IMD-GS-10 details the reporting procedures for potential UIC incidents. The UIC Incident Report is adapted from the US EPA's Enforcement and Compliance History Online (ECHO) environmental violations tool.

4. What is the burden of proof for establishing civil violations? What is the degree of knowledge or intent required for establishing civil violations? What is the burden of proof for establishing criminal violations?
  - 40 CFR 145.13(b)(2): The burden of proof and degree of knowledge or intent required under State law for establishing violations under paragraph (a)(3) of this section, shall be no greater than the burden of proof or degree of knowledge or intent EPA must provide when it brings an action under the Safe Drinking Water Act

- The federal burden for establishing civil violations is the preponderance of the evidence and there is no degree of knowledge or intent requirement.
- The federal burden for establishing criminal violations is beyond a reasonable doubt. Burden of proof for criminal prosecution in Louisiana is proof beyond a reasonable doubt.

LNDR: The burden of proof for civil violations in Louisiana is preponderance of the evidence, which is equivalent to the federal standard. See *Rivera v. United Gas Pipeline Co.*, 96-502 (La. App. 5 Cir. 6/30/97), 697 So. 2d 327, 335, writ denied 97-2030 (La. 12/12/97) 704 So. 2d 1196, and writ denied, 97-2031 (La. 12/12/97), 704 So. 2d 1197, and writ denied, 97-2032 (La. 12/12/97, 704 So. 2d 1197, and writ denied, 97-2034 (La. 12/12/97), 704 So. 2d 1197.

For civil violations, Louisiana’s knowledge requirement is no knowledge, which is equivalent to the federal standard. See R.S. 15:271

For criminal violations, Louisiana’s burden of proof is beyond a reasonable doubt, which is equivalent to the federal standard. See R.S. 15:271.

The knowledge requirement for certain criminal violations in Louisiana is “knowingly and willfully.” La. R.S. 30:18(A)(2). While the federal requirement is “willfully,” 42 U.S.C. § 300h—2(b)(2), courts have interpreted “willfully” as used in this section to require knowledge. See *United States v. King*, 660 F.3d 1071, 1078 (9th Cir. 2011). Therefore, the State views these standards as equivalent.

5. What is the State’s provision for public participation in the enforcement process? Is there intervention allowed as of right to any civil or administrative action by a party having an interest in the action? Or, can Louisiana provide assurance that it will investigate and respond in writing to citizen complaints; not oppose intervention when permissive intervention is required; and publish notice and provide at least 30 days for public comment on any proposed enforcement settlement?
  - La. R.S. 30:1105.C; “Any interested person has the right to have the commissioner call a hearing for the purpose of taking action in respect to a matter within the jurisdiction of the commissioner as provided in this Section by making a request therefor in writing and paying the hearing fee set by the commissioner, as provided by law for hearing conducted pursuant to R.S. 30:6. Upon receiving the request and payment of the required fees the commissioner shall promptly call a hearing. After the hearing and with all convenient speed and within thirty days after the conclusion of the hearing, the commissioner shall take whatever action he deems appropriate with regard to the subject matter.”
  - 40 CFR 145.13(d): Any State administering a program shall provide for public participation in the State enforcement process by providing either: (1) Authority which allows intervention as of right in any civil or administrative action to obtain remedies specified in paragraph (a)(1), (2) or (3) of this section by any citizen having an interest which is or may be adversely affected; or (2) Assurance that the State agency or enforcement authority will: (i) Investigate and provide written responses to all citizen complaints submitted pursuant to the procedures specified in § 145.12(b)(4); (ii) Not

oppose intervention by any citizen when permissive intervention may be authorized by statute, rule, or regulation; and (iii) Publish notice of and provide at least 30 days for public comment on any proposed settlement of a State enforcement action.

LDNR: For administrative actions, any interested person has a right to a hearing before the commissioner on matters under his jurisdiction. See La. R.S. 30:1105.C. Interventions in Louisiana's civil courts are authorized only when a justiciable right exists and the right has connexity with the facts, circumstances, and objects of the main demand. (See Harrison v. Gaylord's Nat'l Corp., 539 So.2d 909 (La. App. 4<sup>th</sup> Cir. 1989) also see La. C.C.P. art. 1091). Despite the fact that Louisiana law describes rights of intervention in civil matters differently than the federal rules of civil procedure, it seems very unlikely that a Louisiana Court would deny intervention to anyone given an unconditional right to intervene pursuant to Rule 24(a)(1) of the Federal Rules of Civil Procedure in a case involving violations of a federal statute, namely, the Safe Drinking Water Act. Finally, members of the public are authorized to bring enforcement suits themselves if the Commissioner fails to enforce after being provided notice of any violation. See R.S. 30:16.

In order to avoid any doubt, in addition to the above authorization for interested parties to participate in administrative and civil enforcement actions, LDNR will: (i) Investigate and provide written responses to all citizen complaints submitted pursuant to the procedures specified in § 145.12(b)(4); (ii) Not oppose intervention by any citizen when permissive intervention may be authorized by statute, rule, or regulation; and (iii) Publish notice of and provide at least 30 days for public comment on any proposed settlement of a State enforcement action.

6. EPA needs clarification on how LDNR's transfer of liability provisions fit together with UIC site closure requirements including how these provisions prevent endangerment to USDWs.

Background:

- LA Class VI rule: (§3633.B) refers to a Certificate of Completion "The commissioner shall not issue a certificate of completion pursuant to R.S. 1109 unless the operator has sufficient financial surety with the Office of Conservation to adequately close the facility, plug all existing wells, and provide for post injection site care and site closure."
- LA R.S. 30:1109.A.1. states "Ten years, or any other time frame established by rule, after cessation of injection into a storage facility, the commissioner shall issue a certificate of completion of injection operations, ***upon a showing by the storage operator that the reservoir is reasonably expected to retain mechanical integrity and the carbon dioxide will reasonably remain emplaced***, at which time ownership to the remaining project including the stored carbon dioxide transfers to the state. Upon the issuance of the certificate of completion of injection operations, the storage operator, all generators of any injected carbon dioxide, all owners of carbon dioxide stored in the storage facility, and all owners otherwise having any interest in the storage facility, ***shall be released from any and all duties or obligations under this Chapter and any and all liability***

***associated with or related to that storage facility which arises after the issuance of the certificate of completion of injection operations.***

- 40 CFR 146.93(b.1-4) require that owners or operators conduct monitoring following the cessation of injection until they can provide ***“substantial evidence” that the geologic sequestration project no longer poses an endangerment to USDWs.*** This monitoring period is referred to as the “post-injection site care” period and is generally set for at least 50 years, unless the owner or operator can make a site-specific alternative timeframe demonstration, based on monitoring, modeling and other site-specific data, that the geologic sequestration project no longer poses an endangerment to USDWs. After the post injection site care period and prior to authorization for site closure, owners or operators must submit for review and approval a demonstration, based on monitoring and other site-specific data, that no additional monitoring is needed to ensure that the geologic sequestration project does not pose an endangerment to USDWs. Owners and operators are required to ***have qualifying financial responsibility instruments sufficient to cover the cost of meeting the requirements of all aspects of the Class VI permitting including the post injection site care and site closure period.*** 40 CFR 146.85(a)(2)(iii) and Louisiana equivalent at 43 La. Admin. Code Pt XVII, 609.C.4.a; see also 146.85(b)(1)(“The owner or operator must maintain financial responsibility and resources until: (i) The Director receives and approves the completed post-injection site care and site closure plan; and (ii) The Director approves site closure.”) and the Louisiana equivalent at 43 La. Admin. Code Pt XVII, 609.C.4.f.
- September 2020: LDNR clarified the CDGSTF is separate from instruments of financial surety required under the commissioner’s UIC authority. Its intended uses include funding program administration and covering any activities that may take place after the site is closed and the commissioner has issued a certificate of completion of injection operations (necessary for liability release) in accordance with La R.S. 30:1109. However, as noted in La R.S. 30:1109.A.2, release of liability won’t apply to the owner or last operator of record if it turns out that the CDGSTF balance for that site contains inadequate funds to address any issues that arise after the certificate of completion is issued post closure. The \$5,000,000 cap on contributions from a particular operator won’t hinder the commissioner in calling required financial surety documents (which again is separate) or from seeking payment into the CDGSTF from the owner/operator of record if the current CDGSTF balance isn’t enough to cover something in that post closure period for the facility in question.

Questions for LDNR:

- Under the relevant Louisiana statute and regulations, can LDNR issue a certificate of completion pursuant to R.S. 1109 before LDNR approves site closure?
  - The statute (R.S. 1109) seems to contemplate issuance “after cessation of injection,” not after LDNR approves site closure (which can happen decades later). Similarly, LDNR’s regulation also seems to contemplate issuance before site closure (by requiring sufficient financial surety with LDNR to adequately close the facility, plug wells, and provide for post-injection site care and site closure).

LDNR: First, it should be noted that La. R.S. 30:1109 was enacted in 2009 prior to EPA's adoption of its Class VI regulations the following year. Therefore, unsurprisingly, its language does not contemplate nor specifically address any requirements found in EPA's rules one way or the other. Despite this, however, nothing in La. R.S. 30:1109 requires it to be implemented in a manner inconsistent with EPA's Class VI requirements and for the reasons set forth herein Louisiana's program will protect USDWs to the same or to a greater extent than EPA's Class VI program.

Second, La. R.S. 30:1109(A)(1) cannot be read in a vacuum, but instead must be considered in light of other Constitutional, statutory, and regulatory authorities and requirements. One such statutory authority is found at La. R.S. 30:1106(A) which states, "[t]he commissioner shall have authority to perform any and all acts necessary to carry out the purposes and requirements of the federal Safe Drinking Water Act." Such acts the commissioner may perform include decisions on applications for certificates of completion of injection operations when such a decision is necessary to ensure compliance with the federal Class VI program. In furtherance of this authority, the commissioner commits to coordinate with EPA prior to granting any certificate of completion of injection operations to ensure doing so is consistent with the requirements of the federal Safe Drinking Water Act. In addition to coordinating with EPA, interested parties and the public will have a meaningful opportunity to provide input in the process as well. Issuance of the certificate of completion with a limited release of liability pursuant to La. R.S. 30:1109(A) would only occur after public notice and hearing in accordance with La. R.S. 30:1105 in the parish where the storage facility is located. Additionally, pursuant to La. R.S. 30:12, the issuance of any certificate of completion is subject to judicial review upon an appeal by any aggrieved party, including the USEPA.

The commissioner's authority under La. R.S. 30:1106 further combines with his obligation and commitment to enforce the provisions of LAC 43:XVII.3633 and CFR Title 40, § 146.93 as set forth in the Memorandum of Agreement Addendum 1 between the LDNR and the USEPA Region 6 which was executed on September 17, 2021 by the Louisiana Commissioner of Conservation and on May 11, 2022 by the USEPA Regional Administrator, R6. This addendum states, in part,

#### I.C Conformance with Laws and Regulations

The Louisiana Injection and Mining Division (IMD), a division within LDNR, shall administer the Class VI UIC program consistent with the state's submission for program approval, the program MOA, this Addendum, the Safe Drinking Water Act (SDWA), current federal policies and regulations, promulgated minimum requirements, priorities established as part of the annually approved state UIC grant, state and federal law, and any separate working agreements which shall be entered into with the Regional Administrator as necessary for the full administration of the Class VI UIC program.

Thus, the commissioner is not only authorized but clearly obligated to implement La. R.S. 30:1109 in a manner consistent with the federal requirements.

Third, La. R.S. 30:1109(A)(1) states that issuance of a certificate of completion is to take place “[t]en years **or any other time frame established by rule.**” Thus, this provision is modified by Louisiana’s Class VI rules dated January 20, 2021. This specifically includes LAC 43:XVII.3633 that requires sufficient financial surety to “adequately close the facility, plug all existing wells, and provide for post injection site care and site closure” prior to issuance of a certificate of completion of injection operations. Such financial security is required to be maintained by the operator until site closure of the facility is approved in accordance with LAC 43:XVII.3609(C)(4)(f). Therefore, even if after consultation with EPA it is agreed that issuance of such a certificate may occur consistent with the Safe Drinking Water Act prior to full closure of the facility; the operator of record is required to maintain financial surety until full closure of the facility under Class VI requirements takes place.

Fourth, LDNR interprets the requirements of La. R.S. 30:1109(A) that, prior to issuance of a certificate of completion of injection operations, it be demonstrated that “the reservoir is reasonably expected to retain mechanical integrity and the carbon dioxide will reasonably remain emplaced, at which time ownership to the remaining project including the stored carbon dioxide transfers to the state” is substantially similar to the requirements of the federal and state Class VI requirements for facility closure. Additionally, in both the case of facility closure under Class VI regulations and in carrying out the decision to issue a certificate of completion of injection operations, Louisiana Constitution art. IX, sec. 1 requires LDNR to ensure that it protects the environment and natural resources, as well as, the health, safety, and welfare of the people. Due to the construction of some legacy wells, aka artificial penetrations (AP’s), within the area of review (AOR) some wells may pose a greater threat to the health, safety and welfare of the public than to the USDW. The LDNR is mandated to protect both. All of this combines to mean that LDNR cannot issue a certificate of completion of injection operations unless it determines that the risk a storage facility may pose to the USDW or the health, safety and welfare of the public is no greater than that which is contemplated by federal Class VI requirements.

Finally, as is discussed in greater detail in our answer to the next question, Louisiana law establishes a Carbon Dioxide Geologic Sequestration Trust Fund (CDGSTF) to address any future obligations that may arise after issuance of a certificate of completion of injection operations, which provides an additional layer of protection beyond what exists in the federal UIC program. In the event the CDGSTF is insufficiently funded to address these obligations, then the State is authorized to go back to the last operator of the carbon storage facility to ensure compliance with the Class VI requirements.

For the reasons set forth above, Louisiana’s program will ensure equivalent or greater protection of USDWs as the federal requirements.

- If LDNR can issue a certificate of completion before LDNR approves site closure:

- How would this be squared with 40 CFR 146.85(b)(1) and 43 La. Admin. Code Pt XVII, 609.C.4.f? Those provisions require the o/o to maintain financial responsibility until the Director approves site closure, whereas the certification of completion releases the o/o from “any and all duties or obligations” (La R.S. 30:1109.A.1)—including, presumably, financial responsibility obligations.

Please see answer above. This rule modifies the limited release of liability found in La. R.S. 30:1109(A)(1), creating a condition precedent to being issued such certificate. The certificate of completion and any release of liability will not occur until the operator is compliant with the obligation to establish and maintain sufficient financial surety to assure adequate final closure of the facility in accordance LAC 43:XVII.3633. Again, this requirement survives the issuance of a certificate of completion of injection operations.

- How would Louisiana’s approach be as stringent as the federal approach of requiring the o/o to maintain financial responsibility until the Director approves site closure?

In addition to the answers above, attached you will please find the Louisiana cross-walk comparing federal rules with Louisiana rules. This attachment is part of the primacy application, but is focused upon differences between the respective rules and areas in which the Louisiana rules are more restrictive than the federal counterpart.

- In LDNR’s 2020 clarification, LDNR explained that the liability release in La R.S. 30:1109 “will not apply to the owner or last operator of record of a storage facility if the Carbon Dioxide Geologic Storage Trust Fund has been depleted of funds such that it contains inadequate funds to address or remediate any duty, obligation, or liability that may arise after issuance of the certificate of completion of injection operations.” La R.S. 30:1109.A.2. If the CDGSTF fund does indeed become depleted in the future, how could LDNR ensure that the former o/o still has the funds to address any issues that arise after the certificate was issued? The issuance of the certificate has already released the o/o from “any and all duties or obligations” (La R.S. 30:1109.A.1)—including, presumably, financial responsibility obligations.

The Carbon Dioxide Geologic Storage Trust Fund is an additional surety to address any potential issues that may arise after site closure pursuant to LAC 43:XVII.3633 and Title 40, § 146.93. This is more restrictive than the federal rule found at CFR Title 40, 146.85 which provides for the release of all financial surety after final site closure. Because there are no guarantees of the operator remaining solvent after site closure, the state of Louisiana has provided for this additional surety to address potential unforeseen future issues.

- LDNR’s clarified in 2020 that the \$5,000,000 cap on contributions from a particular operator won’t hinder the commissioner in calling required financial surety documents. But if the operator is already released from “any and all duties or obligations” (La R.S.

30:1109.A.1)—including, presumably, financial responsibility obligations—is the operator still obligated to have financial surety documents?

Please see the answers above. The requirement to maintain financial surety survives and is a condition precedent to being issued a certificate of completion of injection operations. Except for the \$5 million in the Carbon Dioxide Geologic Storage Trust Fund, which will be held indefinitely, financial surety required pursuant to LAC 43:XVII.3609 and CFR Title 40, § 146.85 will not be released until the operator is compliant with the requirements of LAC 43:XVII.3633, the permit, and CFR Title 40, § 146.93 which is consistent with the requirements of the USEPA.

**JOHN BEL EDWARDS**  
GOVERNOR

**State of Louisiana**  
DEPARTMENT OF NATURAL RESOURCES  
OFFICE OF CONSERVATION

**THOMAS F. HARRIS**  
SECRETARY

**RICHARD P. IEYOUB**  
COMMISSIONER OF CONSERVATION

**MEMORANDUM**

**POLICY NO.:** IMD-GS-12

**EFFECTIVE DATE:** October 6, 2022

**SUBJECT:** Public Reporting of Potential UIC Violations

**BACKGROUND:**

On September 17, 2021, the State of Louisiana submitted the document entitled "Class VI USEPA Primacy Application" to the United States Environmental Protection Agency. The submission proposes to revise the existing Underground Injection Control (UIC) program under Section 1422 of the Safe Drinking Water Act (SWDA) by adding primary enforcement authority over Class VI geologic sequestration wells.

The Louisiana Department of Natural Resources (LDNR) is the lead agency to coordinate the implementation of the Class VI UIC program as authorized by Section 1442 of SWDA. The Injection and Mining Division (IMD), a division within LDNR, shall administer the Class VI UIC program consistent with the state's submission for program approval, the program Memorandum of Agreement (MOA) with Addendums, the SWDA, current federal policies and regulations, promulgated minimum requirements, priorities established as part of the annually approved state UIC grant, state and federal law, and any separate working agreements which shall be entered into with the Regional Administrator as necessary for the full administration of the Class VI UIC program

LDNR's submission for program approval states that, "The LDNR shall provide the opportunity for the public to submit information on violations and shall have procedures for receiving, investigating, and ensuring proper consideration of the information."

Additionally, 40 CFR 145.12(b) (4) states that the state shall maintain, "Procedures for receiving and ensuring proper consideration of information submitted by the public about violations. Public effort in reporting violations shall be encouraged and the State Director shall make available information on reporting procedures."

The IMD website currently provides contact information for this Office in the form of a physical address, a mailing address, a phone number, a division email address, and an email address for the IMD Director. Contact information to report environmental emergencies is also available on the IMD website. This includes a toll-free hotline for the Louisiana State Police and a 24-hour service phone number specifically designated for the reporting of incidents related to injection wells or exploration and production (E&P) wastes.

**POLICY:**

Members of the public can report possible injection well violations by filling out and submitting a UIC Incident Report (Attachment 1). Upon completion and submission of the report, it will be sent to the primary IMD email address. The report will then be forwarded to the an IMD supervisor or manager to review and determine whether an investigation is warranted or if additional information may be needed.

Any tips or complaints submitted to IMD via mail, email, or phone call will also be forwarded to the appropriate IMD supervisor or manager to review whether an investigation is warranted or if additional information may be needed. Mail, email, and phone submissions will be given the same level of due consideration as the submissions via the UIC Incident Report and will be reviewed accordingly.

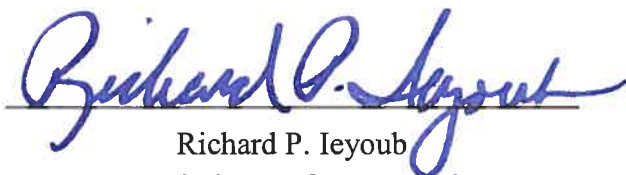

All reports that are deemed relevant will receive written responses if contact information is included with the submission.

A summary of all reports of possible injection well violations submitted to IMD by members of the public will be prepared for the IMD Director at the end of each month. This summary will detail each tip or complaint received and its review status.

The UIC Incident Report is not intended for the reporting of events that may lead to an immediate threat to human health or the environment. All environmental emergencies related to injection wells should be reported immediately to the State Police so that the appropriate response personnel will be deployed. However, members of the public are encouraged to utilize the 24-hour service phone number designated for incidents related to injection wells after contacting the State Police.

**APPROVED BY:**

Stephen H. Lee, Director  
Injection & Mining Division

Richard P. Ieyoub  
Commissioner of Conservation

**OFFICE OF CONSERVATION**

INJECTION AND MINING DIVISION  
617 NORTH 3<sup>RD</sup> STREET  
BATON ROUGE, LA 70802

**UIC INCIDENT REPORT**

If you are seeing an environmental event that may lead to an immediate threat to human health or the environment, call the State Police at (877) 925-6595, then report it to Office of Conservation’s 24-Hour Service at (225) 342-5515.

BASIC VIOLATION INFORMATION	
1. SUSPECTED VIOLATOR’S NAME:	
2. SUSPECTED VIOLATION LOCATION:	
3. SUSPECTED VIOLATION CITY:	4. SUSPECTED VIOLATION ZIP CODE:
5. ASSOCIATED PARTIES (oil and gas operator, consulting firms, trucking companies, etc):	
<input type="checkbox"/> INDIVIDUAL	<input type="checkbox"/> GOVERNMENT/MILITARY
<input type="checkbox"/> COMPANY	<input type="checkbox"/> UNKNOWN

VIOLATION CHARACTERIZATION	
11. IS THE SUSPECTED VIOLATION STILL OCCURRING? <input type="checkbox"/> YES <input type="checkbox"/> NO	12. DATE OF INCIDENT:
13. IS THIS AN EMERGENCY? <input type="checkbox"/> YES <input type="checkbox"/> NO If you are seeing an environmental event that may lead to an <b>immediate threat</b> to human health or the environment, <b>call the State Police at (877) 925-6595</b> , then report it to Office of Conservation’s 24-Hour Service at <b>(225) 342-5515</b> .	14. DOES THE ACTION APPEAR INTENTIONAL? <input type="checkbox"/> ACCIDENTAL <input type="checkbox"/> INTENTIONAL <input type="checkbox"/> UNKNOWN
15. VIOLATION TYPE:	
<input type="checkbox"/> UNAUTHORIZED INJECTION (NO PERMIT, INJECTION OF UNAUTHORIZED FLUID)	
<input type="checkbox"/> OPERATING ABOVE MAXIMUM ALLOWABLE SURFACE INJECTION PRESSURE (MASIP)	
<input type="checkbox"/> MECHANICAL INTEGRITY FAILURE – ENDANGERING UNDERGROUND SOURCE OF DRINKING WATER (USDW)	
<input type="checkbox"/> FAILURE TO REPORT A VIOLATION	
<input type="checkbox"/> RELEASE OF FLUIDS AT THE SURFACE	
<input type="checkbox"/> INDUCED SEISMICITY FELT AT GROUND SURFACE	
<input type="checkbox"/> FALSIFIED (THE TAMPERING, MISREPRESENTATION, OR OTHERWISE ALTERING OF DOCUMENTS, PERMITS, CERTIFICATIONS, OR ANY OTHER RECORDS REQUIRED BY ENVIRONMENTAL STATUTES AND/OR REGULATIONS)	
<input type="checkbox"/> OTHER	

**16. VIOLATION DESCRIPTION**

Include a detailed description of the violation. If necessary, include specific directions (or GPS coordinates) to the violation location from the nearest intersection, main road, or waterway.

**17. MEDIA FILES:** PLEASE SUBMIT ANY PHOTOS OR VIDEO FILES TO INJECTION-MINING@LA.GOV

*I understand that I am providing the information in this tip or complaint to the Louisiana Department of Natural Resources (LDNR), a state agency with the authority to investigate and seek penalties for certain violations of law. I understand that any information I provide in this tip or complaint must be true and accurate to the best of my knowledge. I also understand that LDNR may review any information provided in this tip or complaint to determine whether or not an investigation into the matter is warranted.*

**Crosswalk for Louisiana UIC Regulations Submitted with Primacy Applications Under Section 1422 of the SDWA**

The following tables compare the regulatory language submitted by Louisiana to EPA’s regulations applicable to Class VI wells, specifically Parts 124, 144, and 146 under Title 40 of the CFR. Under Section 1422 of the SDWA, the State’s program must meet the requirements of EPA UIC regulations. Cadmus reviewed the crosswalk and Louisiana’s draft UIC regulations provided to EPA on April 2, 2020; notes of this review (completed in May 2020) are provided in the “Cadmus review” column. Cadmus reviewed an updated crosswalk in August 2020; any notes of this review are in the “Cadmus review” column, preceded by the text “August 2020 review.” **Blue and/or track change text =LA additions or deletions; Purple text- EPA Review**

<b>PART 124--PROCEDURES FOR DECISION MAKING</b>						
<b>SUBPART A--GENERAL PROGRAM REQUIREMENTS</b>						
<b>40 CFR 124.3 Application for a permit</b>						
1	40 CFR 124.3(a)(1) (See also 145.11(a)(24))	Applicable to State programs, see §145.11 (UIC). (1) Any person who requires a permit under the UIC programs shall complete, sign, and submit to the Director an application for each permit required under §144.1 (UIC). <del>Applications are not required for underground injections authorized by rules (§§ 144.21 through 144.26).</del>	<del>§603605.C through 603605.C.1</del> ----- <del>§603603.E through 603603.E.1</del>	<del>C. Application Required</del> 1. Permit Application. New applicants, permittees, and any person required to have a permit shall complete, sign, and submit an application to the commissioner as described in this Section. a. the applicant shall submit one signed paper version of the application and an exact duplicate of the application in an electronic format approved by the commissioner. The commissioner may request additional paper copies of the application—either in its entirety or in part—as needed. b. the electronic version of the application shall contain the following certification statement: This document is an electronic version of the application titled (Insert Document Title) dated (Insert Application Date). This electronic version is an exact duplicate of the paper copy submitted in (Insert the Number of Volumes Comprising the Full Application) to the Louisiana Office of Conservation. c. The applicant shall submit the application identified in §603605.C.1 above to the USEPA in an electronic format approved by the USEPA. ----- E. Authorization of Underground Injection by Rule 1. Class VI wells cannot be authorized by rule to inject carbon dioxide. Owners or operators of Class VI wells must obtain a permit.	Language has been added at <del>§603605.C</del> to clarify requirements for submission of permit applications. These include more stringent requirements compared to the federal rule.  The struck-out text of 40 CFR 124.3(a)(1) will not be adopted. Authorization by rule for Class VI wells will be prohibited.	Reviewed; no issues found.

**Commented [LS1]:** Note: LA regulation was updated from LAC 43:XVII.Chapter 6 to LAC 43:XVII.Chapter 36 upon final adoption. All chapter references under LA Citation, LA Rule Text, and Difference have been updated with the new chapter number.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

2	40 CFR 124.3(a)(2) (See also 145.11(a)(24))	The Director shall not begin the processing of a permit until the applicant has fully complied with the application requirements for that permit. See §144.31 (UIC).	§ <del>64361</del> 1.B.2 through <del>64361</del> 1.B.3	<p>2. Check for completeness:</p> <p>a. <del>the commissioner shall not issue a permit before receiving an application form and any required supplemental information which are completed to his satisfaction. The completeness of any application for a permit shall be judged independently of the status of any other permit application or permit for the same facility or activity;the commissioner shall not issue a permit before receiving an application form and any required supplemental information which are completed to his satisfaction;</del></p> <p>b. each application for a permit submitted for a new UIC injection well will be reviewed for completeness by the commissioner and the applicant will be notified of the commissioner's decision within 30 days of its receipt. Each application for a permit submitted for an existing injection well will be reviewed for completeness and the applicant will be notified of the commissioner's decision within <del>60 day</del><u>60 days</u> of receipt. Upon completing the review, the commissioner shall notify the applicant in writing whether the application is complete.</p> <p>3. Incomplete Applications</p> <p>a. If the application is incomplete, the commissioner shall list in the notification in <del>§64361</del>1.B.2.b above, the information necessary to make the application complete. When the application is for an existing UIC injection well, the commissioner shall specify in the notice a date for submitting the necessary information. The commissioner shall notify the applicant that the application is complete upon receiving this information. The commissioner may request additional information from an applicant only when necessary to clarify, modify, or supplement previously submitted material. Requests for such additional information will not render an application incomplete.</p> <p>b. If an applicant fails or refuses to correct deficiencies found in the application, the permit may be denied and, for existing wells, appropriate enforcement actions may be taken under the applicable statutory provision.</p>		<p>Text is similar, with no impact on stringency.</p> <p>Note that <del>6461</del>1.B.3 was not in the crosswalk LA submitted; added in review.</p> <p>August 2020 review: revised text addresses the above comment; state provision is similar to CFR, except for emergency permits. No concerns for stringency.</p>
---	--	--	---	---	--	---

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt "optional" program elements such as authorization by rule.

3	40 CFR 124.3(a)(3) (See also 145.11(a)(24))	Permit applications must comply with the signature and certification requirements of § 144.32 (UIC).	§603605.E through 603605.G	<p>E. Signature Requirements. All permit applications shall be signed as follows.</p> <p>1. Corporations. By a principal executive officer of at least the level of vice-president, or duly authorized representative of that person if the representative performs similar policy making functions for the corporation. A person is a duly authorized representative only if:</p> <p>a. the authorization is made in writing by a principle executive officer of at least the level of vice-president;</p> <p>b. the authorization specifies either an individual or position having responsibility for the overall operation of a sequestration well, such as the position of plant manager, superintendent, or position of equivalent responsibility. A duly authorized representative may thus be either a named individual or any individual occupying a named position; and</p> <p>c. the written authorization is submitted to the Office of Conservation.</p> <p>2. Limited Liability Company (LLC). By a member if the LLC is member-managed, by a manager if the LLC is manager-managed, or by a duly authorized representative only if:</p> <p>a. the authorization is made in writing by an individual who would otherwise have signature authority as outlined in §603605.E.2 above;</p> <p>b. the authorization specifies either an individual or position having responsibility for the overall operation of a solution-mining well, such as the position of plant manager, superintendent, or position of equivalent responsibility. A duly authorized representative may thus be either a named individual or any individual occupying a named position; and</p> <p>c. the written authorization is submitted to the Office of Conservation.</p> <p>3. Partnership or Sole Proprietorship. By a general partner or proprietor, respectively; or</p> <p>4. Public Agency. By either a principal executive officer or a ranking elected official of a municipality, state, federal, or other public agency.</p> <p>F. Signature Reauthorization. If an authorization under §603605.E is no longer accurate</p>	While the language at §603607.E through 603607.E.4 is not verbatim to 40 CFR 144.32, the intent of the federal rule is preserved; that being, designation of a duly authorized representative by applicants, permittees, or any person required to have a permit.	Text is similar, with no impact on stringency. See also 144.32 for specifics of the comparison to LA vs. CFR.

				<p>because a different individual or position has responsibility for the overall operation of a sequestration well, a new authorization satisfying the signature requirements must be submitted to the Office of Conservation before or concurrent with any reports, information, or applications required to be signed by an authorized representative.</p> <p>G. Certification. Any person signing a document under §603605.E shall make the following certification on the application:            "I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and/or imprisonment."</p>		
<b>40 CFR 124.5 Modification, revocation and reissuance, or termination of permits.</b>						
4	40 CFR 124.5(a) (See also 145.11(a)(25))	(Applicable to State programs, see §145.11 (UIC).) Permits may be modified, revoked and reissued, or terminated either at the request of any interested person (including the permittee) or upon the Director's initiative. However, permits may only be modified, revoked and reissued, or terminated for the reasons specified in § 144.39 or 144.40 (UIC). All requests shall be in writing and shall contain facts or reasons supporting the request.	§643613.B.2 through 643613.B.3	<p>2. The permittee shall furnish to the commissioner, within 30 days, any information which the commissioner may request to determine whether cause exists for modifying, revoking and reissuing, or terminating a permit, or to determine compliance with the permit. The permittee shall also furnish to the commissioner, upon request, copies of records required to be kept by the permit.</p> <p>3. The commissioner may, upon his own initiative or at the request of any interested person, review any permit to determine if cause exists to modify, revoke and reissue, or terminate the permit for the reasons specified in §643613.C, D, and E. All requests shall be in writing and shall contain facts or reasons supporting the request.</p>	In addition to the text at 40 CFR 145.11 the following language has been added at §643613.B.2: the permittee shall furnish to the commissioner, within 30 days, any information which the commissioner may request to determine whether cause exists for modifying, revoking and reissuing, or terminating a permit, or to determine compliance with the permit. The permittee shall also furnish to the commissioner, upon request, copies of records required to be kept by the permit.	Text is similar, with no impact on stringency.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt "optional" program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
5	40 CFR 124.5(b)	If the Director decides the request is not justified, he or she shall send the requester a brief written response giving a reason for the decision. Denials of requests for modification, revocation and reissuance, or termination are not subject to public notice, comment, or hearings. Denials by the Regional Administrator may be informally appealed to the Environmental Appeals Board by a letter briefly setting forth the relevant facts. The Environmental Appeals Board may direct the Regional Administrator to begin modification, revocation and reissuance, or termination proceedings under paragraph (c) of this section. The appeal shall be considered denied if the Environmental Appeals Board takes no action on the letter within <del>60 day</del> 60 days after receiving it. This informal appeal is, under 5 U.S.C. 704, a prerequisite to seeking judicial review of EPA action in denying a request for modification, revocation and reissuance, or termination.	§ <del>6+361</del> 3.B.4	4. If the commissioner decides the request is not justified, he shall send the person making the request a brief written response giving a reason for the decision. Denials of requests for modification, revocation and reissuance, or termination are not subject to public notice, comment, or hearings.		Text is identical but does not include “Denials by the Regional Administrator...” (that provision is specific to EPA decisions and not applicable to states).
6	40 CFR 124.5(c)(1) (See also 145.11(a)(25))	(Applicable to State programs, see 40 CFR 145.11 (UIC)). (1) If the Director tentatively decides to modify or revoke and reissue a permit under 404 CFR 144.39 (UIC), he or she shall prepare a draft permit under § 124.6 incorporating the proposed changes. The Director may request additional information and, in the case of a modified permit, may require the submission of an updated application. In the case of revoked and reissued permits, the Director shall require the submission of a new application.	§ <del>6+361</del> 3.B.5	5. If the commissioner decides to modify or revoke and reissue a permit under § <del>6+361</del> 3.C, D, and E, he shall prepare a draft permit under § <del>6+361</del> 1.C incorporating the proposed changes. The commissioner may request additional information and, in the case of a modified permit, may require the submission of an updated permit application. In the case of revoked and reissued permits, the commissioner shall require, if necessary, the submission of a new application.		Text drops “tentatively” and makes the submission of a new application required only if necessary. No impact on stringency.
7	40 CFR 124.5(c)(2) (See also 145.11(a)(25))	In a permit modification under this section, only those conditions to be modified shall be reopened when a new draft permit is prepared. All other aspects of the existing permit shall remain in effect for the duration of the unmodified permit. When a permit is revoked and reissued under this section, the entire permit is reopened just as if the permit had expired and was being reissued. During any revocation and reissuance proceeding the permittee shall comply with all conditions of the existing permit until a new final permit is reissued.	§ <del>6+361</del> 3.B.5	6. In a permit modification under this section, only those conditions to be modified shall be reopened when a new draft permit is prepared. All other aspects of the existing permit shall remain in effect for the duration of the unmodified permit. When a permit is revoked and reissued under this section, the entire permit is reopened just as if the permit had expired and was being reissued. During any revocation and reissuance proceeding the permittee shall comply with all conditions of the existing permit until a new final permit is reissued.		Text is identical.

32	40 CFR 124.10(b)(1) (See also 145.11(a)(28))	Timing (applicable to State programs, see §145.11 (UIC)).  Public notice of the preparation of a draft permit (including a notice of intent to deny a permit application) required under paragraph (a) of this section shall allow <u>at least</u> 30 days for public comment.	§ <del>64</del> <u>36</u> 11.E.2.a	a. Public notice of the preparation of a draft permit ( <u>including a notice of intent to deny a permit application</u> ) required under § <del>64</del> <u>36</u> 11.E.1 shall allow 30 days for public comment.	The struck-out text of 40 CFR 124.10(b)(1) will not be adopted.	§611.E.1 does not include notice of intent to deny a permit application. Elimination of the struck out text is acceptable as long as the comment period may not be shorter than 30 days. August 2020 review: the added text would address the above comment and make the state provision similar to the CFR. However, this text is not included in the July version of the Rule. EPA August Review: LA should add their inserted crosswalk text from the “LA Rule Text” column “(including a notice of intent to deny a permit application)” to LA Rule under 611.E.2.a  <u>EPA September Review: The added text addresses August comment; EPA has no further concerns.</u>
33	40 CFR 124.10(b)(2) (See also 145.11(a)(28))	Public notice of a public hearing shall be given <u>at least</u> 30 days before the hearing. (Public notice of the hearing may be given at the same time as public notice of the draft permit and the two notices may be combined.)	§ <del>64</del> <u>36</u> 11.E.2.b	b. Public notice of a public hearing shall be given 30 days before the hearing. (Public notice of the hearing may be given at the same time as public notice of the draft permit and the two notices may be combined).	The struck-out text of 40 CFR 124.10(b)(2) will not be adopted.	Text is similar, with no impact on stringency. Elimination of the struck out text is acceptable as long as notice of a hearing may not be less than 30 days.
34	40 CFR 124.10(c)(1) (See also 145.11(a)(28))	Methods (applicable to State programs, see 40 CFR 145.11 (UIC)). Public notice of activities described in paragraph (a)(1) of this section shall be given by the following methods: (1) By mailing a copy of a notice to the following persons (any person otherwise entitled to receive notice under this paragraph may waive his or her rights to receive notice for any classes and categories of permits);	§ <del>64</del> <u>36</u> 11.E.3. through <del>64</del> <u>36</u> 11.E.3.a	3. Methods. Public notice of activities described in § <del>64</del> <u>36</u> 11.E.1.a shall be given by the following methods: a. <u>by electronic mailing (emailing) or</u> by mailing a copy of a notice to the following persons (any person otherwise entitled to receive notice under this Section may waive his rights to receive notice for any classes and categories of permits):	The following language has been added at § <del>64</del> <u>36</u> 11.E.3.a: or <u>by</u> electronic mailing (e-mailing).	Clarification may be needed regarding whether all interested members of the public without email addresses will receive notice. August 2020 review: added text addresses the above comment; no concerns for stringency.
35	40 CFR 124.10(c)(1)(i) (See also 145.11(a)(28))	The applicant;	§ <del>64</del> <u>36</u> 11.E.3.a.i	i. the applicant;		Text is identical.

Commented [KS2]: Updated

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
36	40 CFR 124.10(c)(1)(ii) (See also 145.11(a)(28))	Any other agency which the Director knows has issued or is required to issue a RCRA, UIC, PSD (or other permit under the Clean Air Act), NPDES, 404, sludge management permit, or ocean dumping permit under the Marine Research Protection and Sanctuaries Act for the same facility or activity (including EPA when the draft permit is prepared by the State);	§643611.E.3.a.i i	ii. any other agency which the commissioner knows has issued or is required to issue a permit for the same facility or activity (including EPA);	While the language at §643611.E.3.a.ii is not verbatim to 40 CFR 124.10(c)(1)(ii), the intent of the federal rule is preserved: that being, any agency that has issued or is required to issue a permit for the same facility or activity shall receive a copy of a public notice of activities.	Reviewed; no issues found.
37	40 CFR 124.10(c)(1)(iii) (See also 145.11(a)(28))	Federal and State agencies with jurisdiction over fish, shellfish, and wildlife resources and over coastal zone management plans, the Advisory Council on Historic Preservation, State Historic Preservation Officers, including any affected States (Indian Tribes). (For purposes of this paragraph, and in the context of the Underground Injection Control Program only, the term State includes Indian Tribes treated as States.)	§643611.E.3.a.ii ii	iii. federal and state agencies with jurisdiction over fish, shellfish, and wildlife resources and over coastal zone management plans, the Advisory Council on Historic Preservation, the State Archeological Survey and Antiquities Commission, the Director of the Public Water Supply Supervision program in the State, <u>the Department of Natural Resources</u> , and other appropriate government authorities, including <u>any unit of local government having jurisdiction over the area where the facility is proposed to be located</u> , any affected <u>states or Indian Tribes</u> ; and	While the language at §643611.E.3.a.iii is not verbatim to 40 CFR 124.10(c)(1)(iii), the intent of the federal rule is preserved: that being, although the state requirements do not specify that notice be given to the same entities required by the federal rule, they do include notice to “other appropriate government authorities.”	Text does not include stipulation that Indian Tribes be treated as states, or that they are included as “appropriate government authorities.” State is specifically defined under §601 to mean the state of Louisiana. August 2020 review: added text addresses the above comment; state provision is now similar to CFR.
38	40 CFR 124.10(c)(1)(ix)(A) (See also 145.11(a)(28))	Persons on a mailing list developed by: (A) Including those who request in writing to be on the list;	§643611.E.3.a.i v and 643611.E.3.a.iv (a)	iv. persons on a UIC mailing list developed by: (a). including those who request in writing to be on the list;		Text is identical.
39	40 CFR 124.10(c)(1)(ix)(B) (See also 145.11(a)(28))	Soliciting persons for “area lists” from participants in past permit proceedings in that area; and	§643611.E.3.a.i v	(b). soliciting persons for “area lists” from participants in past permit proceedings in that area; and		Text is identical.
40	40 CFR 124.10(c)(1)(ix)(C) (See also 145.11(a)(28))	Notifying the public of the opportunity to be put on the mailing list through periodic publication in the public press and in such publications as Regional and State funded newsletters, environmental bulletins, or State law journals. (The Director may update the mailing list from time to time by requesting written indication of continued interest from those listed. The Director may delete from the list the name of any person who fails to respond to such a request.)	§643611.E.3.a.i v	(c). notifying the public of the opportunity to be put on the mailing list through periodic publication in the public press and in such publications as Regional and State funded newsletters, environmental bulletins, or State law journals. (The commissioner may update the mailing list from time to time by requesting written indication of continued interest from those listed. The commissioner may delete from the list the name of any person who fails to respond to such a request.)		Text is identical.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
41	40 CFR 124.10(c)(1)(x) (See also 145.11(a)(28))	(A) To any unit of local government having jurisdiction over the area where the facility is proposed to be located; and (B) to each State agency having any authority under State law with respect to the construction or operation of such facility.	§643611.E.3.a.i through 643611.E.3.a.iii	ii. any other agency which the commissioner knows has issued or is required to issue a permit for the same facility or activity (including EPA); iii. federal and state agencies with jurisdiction over fish, shellfish, and wildlife resources and over coastal zone management plans, the Advisory Council on Historic Preservation, the State Archeological Survey and Antiquities Commission, the Director of the Public Water Supply Supervision program in the State, <u>the Department of Natural Resources</u> , and other appropriate government authorities, including <u>any unit of local government having jurisdiction over the area where the facility is proposed to be located</u> , any affected states <u>or Indian Tribes</u> ; and	While the language at 40 CFR 124.10(c)(1)(x) is not adopted, the intent of the federal rule is preserved, in that the notification process outlined at §643611.E.3.a.ii through 643611.E.3.a.iii sufficiently account for notification agencies or government bodies that might be deemed to have an interest in the proceedings even if that body is not explicitly enumerated in the text.	The text leaves out any provision for the notification of local units of government. August 2020 review: revised text addresses the above comment; state provision is now similar to CFR.
42	40 CFR 124.10(c)(1)(xi) (See also 145.11(a)(28))	For Class VI injection well UIC permits, mailing or emailing a notice to State and local oil and gas regulatory agencies and State agencies regulating mineral exploration and recovery, the Director of the Public Water Supply Supervision program in the State, and all agencies that oversee injection wells in the State.	§643611.E.3.a.ii	See above.	While the language at §643611.E.3.a.iii is not verbatim to 40 CFR 124.10(c)(1)(xi), the intent of the federal rule is preserved: that being, <del>although the state requirements does not specify that notice be given to the same entities required by the federal rule, they do include notice to “other appropriate government authorities.”</del> <u>the Department of Natural Resources, as the agency that regulates oil and gas, mineral exploration and recovery, and injection wells, will be notified.</u>	The text does not stipulate whether State and local oil and gas regulatory agencies, or State agencies regulating mineral exploration and recovery, are considered “appropriate government authorities.” It should be noted that LA chose to specifically mention the Director of the Public Water Supply Supervision program, but omitted the other agencies mentioned by the CFR text. August 2020 review: added text addresses the above comment.
43	40 CFR 124.10(c)(2)(i) (See also 145.11(a)(28))	<del>For major permits</del> publication of a notice in a daily or weekly newspaper within the area affected by the facility or activity;	§643611.E.3.b	c. publication of a notice in a daily or weekly newspaper within the area affected by the facility or activity;	The struck-out text of 40 CFR 124.10(c)(2)(i) will not be adopted.	Reviewed; no issues found.
44	40 CFR 124.10(c)(3) (See also 145.11(a)(28))	When the program is being administered by an approved State, in a manner constituting legal notice to the public under State law; and	§643611.E.3.c	c. in a manner constituting legal notice to the public under state law; and		Text is similar, with no impact on stringency.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

57	40 CFR 124.10(e) (See also 145.11(a)(28))	(Applicable to State programs, see §145.11 (UIC).) In addition to the general public notice described in paragraph (d)(1) of this section, all persons identified in paragraphs (c)(1) (i), (ii), (iii), and (iv) of this section shall be mailed a copy of the fact sheet, the permit application (if any) and the draft permit (if any).	§643611.D.3	3. All persons identified in §§643611.E.3.a.i, ii, iii, and iv shall be mailed <b>or emailed</b> a copy of the fact sheet, the draft permit, and a notice that the permit application will be available online.	While the language at §643611.D.3 is not verbatim to 40 CFR 124.10(e), the intent of the federal rule is preserved; that being, although copies of the draft application will not be mailed to all persons identified §643611.E.3.a.i, ii, iii, and iv, they will be notified that the application is available online.	Clarification may be needed regarding whether all interested members of the public without Internet access will receive proper notice (i.e., if the permit application would be mailed upon request).  Note that the draft rule text reads: 3. A copy of the fact sheet shall be mailed to all persons identified in §611.E.3.a.i, ii, iii, and iv. August 2020 review: the rule revision does not directly address the above comment. However, since 611.E.4.a.iv stipulates that the fact sheet include a contact for obtaining information concerning the application, this is likely acceptable.
<b>40 CFR 124.11 Public comments and requests for public hearings.</b>						
58	40 CFR 124.11 (See also 145.11(a)(29))	(Applicable to State programs, see §145.11 (UIC).) During the public comment period provided under § 124.10, any interested person may submit written comments on the draft permit and may request a public hearing, if no hearing has already been scheduled. A request for a public hearing shall be in writing and shall state the nature of the issues proposed to be raised in the hearing. All comments shall be considered in making the final decision and shall be answered as provided in § 124.17.	§643611.F	F. Public Comments and Requests for Public Hearings. During the public comment period provided under §643611.G, any interested person may submit written comments on the draft permit and may request a public hearing, if no hearing has already been scheduled. A request for a public hearing shall be in writing and shall state the nature of the issues proposed to be raised in the hearing. All comments shall be considered in making the final decision and shall be answered as provided in §643611.H.		Text is similar, with no impact on stringency.
<b>40 CFR 124.12 Public hearings.</b>						
59	40 CFR 124.12(a)(1) (See also 145.11(a)(30))	(Applicable to State programs, see §145.11 (UIC).) (1) The Director shall hold a public hearing whenever he or she finds, on the basis of requests, a significant degree of public interest in a draft permit(s);	§643611.G.1	1. The commissioner shall hold a public hearing whenever he finds, on the basis of requests, a significant degree of public interest in (a) draft permit(s). The commissioner also may hold a public hearing at his discretion, whenever, for instance, such a hearing might clarify one or more issues involved in the permit decision. Public notice of the hearing shall be given as specified in §643611.G.	The language from 40 CFR 124.12(a)(2) and 40 CFR 124.12(a)(4) has been added to the text from 40 CFR 124.12(a)(1).	Reviewed; no issues found.

<b>PART 144--UNDERGROUND INJECTION CONTROL PROGRAM</b>						
<b>SUBPART A--GENERAL PROVISIONS</b>						
<b>40 CFR 144.1 Purpose and scope of Part 144.</b>						
70	40 CFR 144.1(f)(1)(viii)	Subpart H of 40 CFR 146 sets forth requirements for owners or operators of Class VI injection wells.				No analogous state text; no impact on stringency. (This row was not in the state's original crosswalk.)

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt "optional" program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
71	40 CFR 144.1(g)	<i>Scope of the permit or rule requirement.</i> The UIC permit program regulates underground injection by six classes of wells (see definition of “well injection,” 40 CFR 144.3). The six classes of wells are set forth in 40 CFR 144.6. All owners or operators of these injection wells must be authorized either by permit or rule by the Director. In carrying out the mandate of the SDWA, this subpart provides that no injection shall be authorized by permit or rule if it results in the movement of fluid containing any contaminant into underground sources of drinking water (USDWs –see 40 CFR 144.3 for definition), if the presence of that contaminant may cause a violation of any primary drinking water regulation under 40 CFR part 141 or may adversely affect the health of persons (40 CFR 144.12). Existing Class IV wells which inject hazardous waste directly into an underground source of drinking water are to be eliminated over a period of six months and new such Class IV wells are to be prohibited (40 CFR 144.13). For Class V wells, if remedial action appears necessary, a permit may be required (40 CFR 144.25) or the Director must require remedial action or closure by order (40 CFR 144.6(c)). During UIC program development, the Director may identify aquifers and portions of aquifers which are actual or potential sources of drinking water. This will provide an aid to the Director in carrying out his or her duty to protect all USDWs. An aquifer is a USDW if it fits the definition under § 144.3, even if it has not been “identified.” The Director may also designate “exempted aquifers” using the criteria in 40 CFR 146.4 of this chapter.	N/A		Note that states are not expected to have language equivalent to this section, as the requirements mentioned here are described in more detail in other parts of the regulation. They are included here to provide background on and a summary of the UIC program. ...	Reviewed; no issues found.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
72	40 CFR 144.1(g) continued	Such aquifers are those which would otherwise qualify as “underground sources of drinking water” to be protected, but which have no real potential to be used as drinking water sources. Therefore, they are not USDWs. No aquifer is an exempted aquifer until it has been affirmatively designated under the procedures at § 144.7. Aquifers which do not fit the definition of “underground source of drinking water” are not “exempted aquifers.” They are simply not subject to the special protection afforded USDWs. During initial Class VI program development, the Director shall not expand the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption for Class VI injection wells and EPA shall not approve a program that applies for aquifer exemption expansions of Class II-Class VI exemptions as part of the program description. All Class II to Class VI aquifer exemption expansions previously issued by EPA must be incorporated into the Class VI program descriptions pursuant to requirements at § 145.23(f)(9).	N/A			Reviewed; no issues found.
<b>40 CFR 144.3 Definitions.</b>						
73	40 CFR 144.3	<i>Administrator</i> means the Administrator of the United States Environmental Protection Agency, or an authorized representative.	N/A		This language is required only if the state’s regulation does not explicitly use the term “EPA Administrator” when referring to the EPA Administrator. For example, if the state refers to the EPA Administrator as simply “the Administrator,” this definition is required. If the state uses the term “EPA Administrator” in its rule language, no definition is required.	Reviewed; no issues found. Note that the state regulations do not make any reference to the EPA Administrator. This provision is not required for state programs.
74		<i>Application</i> means the EPA standard national forms for applying for a permit, including any additions, revisions or modifications to the forms; or forms approved by EPA for use in approved States, including any approved modifications or revisions.	§ <del>60360</del> 1.A	Application—the filing by a person on the Office of Conservation forms for an underground injection permit, including any additions, revisions or modifications to the forms.		Text is similar, with no impact on stringency.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
75		<i>Appropriate Act and regulations</i> means the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act (RCRA); or Safe Drinking Water Act (SDWA), whichever is applicable; and applicable regulations promulgated under those statutes.	N/A			N/A. This provision is not required for state programs.
76		<i>Approved State Program</i> means a UIC program administered by the State or Indian Tribe that has been approved by EPA according to SDWA sections 1422 and/or 1425.	N/A			N/A. This provision is not required for state programs.
77		<i>Aquifer</i> means a geological “formation,” group of formations, or part of a formation that is capable of yielding a significant amount of water to a well or spring.	§603601.A	Aquifer—a geological formation, group of formations, or part of a formation that is capable of yielding a significant amount of water to a well or spring.		Text is identical.
78		<i>Area of review</i> means the area surrounding an injection well described according to the criteria set forth in § 146.06 or in the case of an area permit, the project area plus a circumscribing area the width of which is either 1/4 of a mile or a number calculated according to the criteria set forth in § 146.06.	N/A		<a href="#">A Class VI specific definition of area of review is included with the crosswalk analysis of definitions under 40 CFR 146.81(d).</a>	No state equivalent. The state rules define the area of review for Class VI projects in §615.B.1 (see 146.84).  August 2020 review: no concerns for stringency.
79		<i>Cesspool</i> means a “drywell” that receives untreated sanitary waste containing human excreta, and which sometimes has an open bottom and/or perforated sides.	N/A			N/A. This provision is not required for state programs.
80		<i>Contaminant</i> means any physical, chemical, biological, or radiological substance or matter in water.	§603601.A	Contaminant—any physical, chemical, biological, or radiological substance or matter in water.		Text is identical.
81		<i>Director</i> means the Regional Administrator, the State director or the Tribal director as the context requires, or an authorized representative. When there is no approved State or Tribal program, and there is an EPA administered program, “Director” means the Regional Administrator. When there is an approved State or Tribal program, “Director” normally means the State or Tribal director. In some circumstances, however, EPA retains the authority to take certain actions even when there is an approved State or Tribal program. In such cases, the term “Director” means the Regional Administrator and not the State or Tribal director.	§603601.A	Commissioner—the Assistant Secretary of the Office of Conservation, Department of Natural Resources.		Reviewed; no issues found.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

102		<i>Injection well</i> means a “well” into which “fluids” are being injected.	§603601.A	Injection Well—a well into which fluids are being injected other than fluids associated with active drilling operations.	While the language at §603601.A is not verbatim to the federal definition, the intent of the federal rule is preserved; that being, injected fluids are those that are injected for the purpose of storage or disposal.  <u>The description at §3601.A is a narrower definition of injection well that only applies to wells where fluids are injected for the purpose of storage and is more stringent compared to the federal rule.</u>	Text applies only wells where fluid is injected for storage, which is a narrower definition of injection well than the federal regulation. This difference should not impact stringency for the purpose of CO <sub>2</sub> injection for GS.  August 2020 review: no concerns for stringency.
103		<i>Injection zone</i> means a geological “formation” group of formations, or part of a formation receiving fluids through a “well.”	N/A		<u>A Class VI-specific definition is at §3601.A; see 40 CFR 146.81(d).</u>	No state equivalent. A Class VI-specific definition is at §601.A; see 146.81(d). August 2020 review: no concerns for stringency.
104		<i>Interstate Agency</i> means an agency of two or more States established by or under an agreement or compact approved by the Congress, or any other agency of two or more States or Indian Tribes having substantial powers or duties pertaining to the control of pollution as determined and approved by the Administrator under the “appropriate Act and regulations.”	N/A			N/A. This provision is not required for state programs.
105		<i>Major facility</i> means any UIC “facility or activity” classified as such by the Regional Administrator, or, in the case of approved State programs, the Regional Administrator in conjunction with the State Director.	§603601.A	Major Facility—any Class I or IV hazardous waste injection well facility or activity.		Text applies only to hazardous waste injection well facilities.
106		<i>Manifest</i> means the shipping document originated and signed by the “generator” which contains the information required by subpart B of 40 CFR part <u>262362</u> .	§603601.A	Manifest—the shipping document originated and signed by the generator which contains the information required by the Hazardous Waste Management Program.		Text is similar, with no impact on stringency.
107		<i>New injection wells</i> means an “injection well” which began injection after a UIC program for the State applicable to the well is approved or prescribed.	§603601.A	New Injection Well—a well which began injection after the Louisiana Underground Injection Control program is approved and the applicable (Office of Conservation) rules and regulations are promulgated.		Text is similar, with no impact on stringency.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

108		<i>Owner or operator</i> means the owner or operator of any “facility or activity” subject to regulation under the UIC program.	§603601.A	Operator—the person recognized as being responsible to the Office of Conservation for the well, site, facility, or activity subject to regulatory authority under these rules and regulations. The operator can, but need not be, the owner of the well, site, facility, or activity. Owner—the person that owns any well, site, facility, or activity subject to regulation under the UIC program. The owner can, but need not be, the operator of the well, site, facility, or activity.		Text is similar, with no impact on stringency.
109		<i>Permit</i> means an authorization, license, or equivalent control document issued by EPA or an approved State to implement the requirements of this part, parts 145, 146 and 124. “Permit” includes an area permit (§144.33) and an emergency permit (§144.34). Permit does not include UIC authorization by rule (§144.21), or any permit which has not yet been the subject of final agency action, such as a “draft permit.”	§603601.A	Permit—an authorization, license, or equivalent control document issued by the commissioner to implement the requirements of these regulations. Permit includes, but it is not limited to, area permits and emergency permits. Permit does not include UIC authorization by rule or any permit which has not yet been the subject of final agency action, such as a draft permit.		Text is similar, with no impact on stringency.
110		<i>Person</i> means an individual, association, partnership, corporation, municipality, state, federal, or tribal agency, or an agency or employee thereof	§603601.A	Person—any natural person, individual, association, corporation, partnership, limited liability company, or other entity, receiver, tutor, curator, executor, administrator, fiduciary, municipality, state or federal agency, or an agent or employee of the aforementioned thereof.	In addition to the federal definition, the following language has been added: <b>partnership</b> , limited liability company, or other entity, receiver, tutor, curator, executor, administrator, fiduciary.	Reviewed; no issues found. Partnership is included in the CFR text.  August 2020 review: no concerns for stringency.
111		<i>Plugging</i> means the act or process of stopping the flow of water, oil or gas into or out of a formation through a borehole or well penetrating that formation.	§603601.A	Plugging—the act or process of stopping the flow of water, oil or gas into or out of a formation through a borehole or well penetrating that formation.		Text is identical.
112		<i>Point of injection</i> means the last accessible sampling point prior to waste fluids being released into the subsurface environment through a Class V injection well. For example, the point of injection of a Class V septic system might be the distribution box—the last accessible sampling point before the waste fluids drain into the underlying soils. For a dry well, it is likely to be the well bore itself.	§603601.A	Point of Injection—the last accessible sampling point prior to waste fluids being released into the subsurface environment through a Class V injection well. For example, the point of injection of a Class V septic system might be the distribution box, the last accessible sampling point before the waste fluids drain into the underlying soils. For a dry well, it is likely to be the well bore itself.		Text is identical.
113		<i>Project</i> means a group of wells in a single operation.	§603601.A	Project—a group of wells in a single operation.		Text is identical.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

114		<i>Radioactive Waste</i> means any waste which contains radioactive material in concentrations which exceed those listed in 10 CFR part 20, appendix B, table II, column 2.	§ <del>60360</del> 1.A	Radioactive Waste—any waste which contains radioactive material for which no use or reuse is intended and which is to be discarded.	<u>While the language at §3601.A defines radioactive waste with regards to intended use or reuse of radioactive material rather than the concentration referenced in the federal language, the difference does not impact stringency of Class VI rules.</u>	Text makes no reference to concentrations of said waste. No impact on stringency for Class VI purposes.  August 2020 review: no concerns for stringency.
115		<i>RCRA</i> means the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act of 1976 (Pub. L. 94-580, as amended by Pub. L. 95- <del>60360</del> 9, Pub. L. 96-510, 42 U.S.C. 6901 et seq.).	§ <del>60360</del> 1.A	RCRA—the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act of 1976 (P.L. 94-580 as amended by P.L. 95- <del>60360</del> 9, 42 U.S.C. 6901 et seq.).		Text is similar, with no impact on stringency.
116		<i>Regional Administrator</i> means the Regional Administrator of the appropriate Regional Office of the Environmental Protection Agency or the authorized representative of the Regional Administrator.	N/A			N/A. This provision is not required for state programs.
117		<i>Sanitary waste</i> means liquid or solid wastes originating solely from humans and human activities, such as wastes collected from toilets, showers, wash basins, sinks used for cleaning domestic areas, sinks used for food preparation, clothes washing operations, and sinks or washing machines where food and beverage serving dishes, glasses, and utensils are cleaned. Sources of these wastes may include single or multiple residences, hotels and motels, restaurants, bunkhouses, schools, ranger stations, crew quarters, guard stations, campgrounds, picnic grounds, day-use recreation areas, other commercial facilities, and industrial facilities provided the waste is not mixed with industrial waste.	N/A			N/A. This provision is not required for state programs.
118		<i>Schedule of compliance</i> means a schedule of remedial measures included in a “permit,” including an enforceable sequence of interim requirements (for example, actions, operations, or milestone events) leading to compliance with the “appropriate Act and regulations.”	N/A			N/A. This provision is not required for state programs.
119		<i>Septic system</i> means a “well” that is used to emplace sanitary waste below the surface and is typically comprised of a septic tank and subsurface fluid distribution system or disposal system.	N/A			N/A. This provision is not required for state programs.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

120		<i>SDWA</i> means the Safe Drinking Water Act (Pub. L. 93–523, as amended; 42 U.S.C. 300f et seq. ).	N/A			N/A. This provision is not required for state programs.
121		<i>Site</i> means the land or water area where any “facility or activity” is physically located or conducted, including adjacent land used in connection with the facility or activity.	§603601.A	Site—the land or water area where any facility or activity is physically located or conducted including adjacent land used in connection with the facility or activity.		The state did not include the LA text in their crosswalk; added in review. Text is identical.
122		<i>State</i> means any of the 50 States, the District of Columbia, Guam, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, the Commonwealth of the Northern Mariana Islands, or an Indian Tribe treated as a State.	§603601.A	State—the state of Louisiana.	<u>The usage of the term “state” in these regulations does not encompass tribal entities.</u>	The state did not include the LA text in their crosswalk; added in review.  Text makes no mention of Indian tribes. August 2020 review: state comment is acknowledged; no concerns for stringency.
123		<i>State Director</i> means the chief administrative officer of any State, interstate, or Tribal agency operating an “approved program,” or the delegated representative of the State director. If the responsibility is divided among two or more States, interstate, or Tribal agencies, “State Director” means the chief administrative officer of the State, interstate, or Tribal agency authorized to perform the particular procedure or function to which reference is made.	§603601.A	Commissioner—the Assistant Secretary of the Office of Conservation, Department of Natural Resources.		Text is similar, with no impact on stringency.
124		<i>State/EPA agreement</i> means an agreement between the Regional Administrator and the State which coordinates EPA and State activities, responsibilities and programs.	N/A			N/A. This provision is not required for state programs.
125		<i>Stratum</i> (plural strata) means a single sedimentary bed or layer, regardless of thickness, that consists of generally the same kind of rock material.	§603601.A	Stratum (plural Strata)—a single sedimentary bed or layer, regardless of thickness, that consists of generally the same kind of rock material.		Text is identical.
126		<i>Subsurface fluid distribution system</i> means an assemblage of perforated pipes, drain tiles, or other similar mechanisms intended to distribute fluids below the surface of the ground.	§603601.A	Subsurface Fluid Distribution System—an assemblage of perforated pipes, drain tiles, or other similar mechanisms intended to distribute fluids below the surface of the ground.		Text is identical.
127		<i>Total dissolved solids</i> means the total dissolved (filterable) solids as determined by use of the method specified in 40 CFR part 136.	§603601.A	Total Dissolved Solids—the total dissolved filterable solids as determined by use of the method specified in the 14th edition, pp. 91-92, of Standard Methods for the Examination of Water and Waste Water.		Text is similar, with no impact on stringency. This provision is not required for state programs.
128		<i>Transferee</i> means the owner or operator receiving ownership and/or operational control of the well.	N/A			N/A. This provision is not required for state programs.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
129		<i>Transferor</i> means the owner or operator transferring ownership and/or operational control of the well.	N/A			N/A. This provision is not required for state programs.
130		<i>UIC</i> means the Underground Injection Control program under Part C of the Safe Drinking Water Act, including an “approved State program.”	§603601.A	UIC—the Louisiana State Underground Injection Control Program.		Text is similar, with no impact on stringency.
131		<i>Underground injection</i> means a “well injection.”	§603601.A	Underground Injection—a well injection.		Text is identical.
132		<i>Underground source of drinking water</i> (USDW) means an aquifer or its portion: (a)(1) Which supplies any public water system; or (2) Which contains a sufficient quantity of ground water to supply a public water system; and (i) Currently supplies drinking water for human consumption; or (ii) Contains fewer than 10,000 mg/l total dissolved solids; and (b) Which is not an exempted aquifer.	§603601.A	Underground Source of Drinking Water (USDW)—an aquifer or its portion: a. which supplies any public water system; or b. which contains a sufficient quantity of ground water to supply a public water system; and i. currently supplies drinking water for human consumption; or ii. contains fewer than 10,000 mg/l total dissolved solids; and which is not an exempted aquifer.		Text is identical.
133		<i>Well</i> means: A bored, drilled, or driven shaft whose depth is greater than the largest surface dimension; or, a dug hole whose depth is greater than the largest surface dimension; or, an improved sinkhole; or, a subsurface fluid distribution system.	§603601.A	Well—a bored, drilled or driven shaft, whose depth is greater than the largest surface dimension; or, a dug hole whose depth is greater than the largest surface dimension; or, an improved sinkhole; or, a subsurface fluid distribution system.		Text is similar, with no impact on stringency.
134		<i>Well injection</i> means the subsurface emplacement of fluids through a well.	§603601.A	Well Injection—the subsurface emplacement of fluids through an injection well.		Text is identical.
<b>40 CFR 144.5 Confidentiality of information.</b>						

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
135	40 CFR 144.5 (a)	In accordance with 40 CFR part 2, any information submitted to EPA pursuant to these regulations may be claimed as confidential by the submitter. Any such claim must be asserted at the time of submission in the manner prescribed on the application form or instructions or, in the case of other submissions, by stamping the words "confidential business information" on each page containing such information. If no claim is made at the time of submission, EPA may make the information available to the public without further notice. If a claim is asserted, the information will be treated in accordance with the procedures in 40 CFR part 2 (Public Information).	§ <del>60360</del> 3.I	I. Confidentiality of Information. Information obtained by any rule, regulations, order, or permit term or condition adopted or issued hereunder, or by any investigation authorized thereby, shall be available to the public, unless nondisclosure is requested in writing and such information is determined by the commissioner to require confidentiality to protect trade secrets, processes, operations, style of work, apparatus, statistical data, income, profits, losses, or in order to protect any plan, process, tool, mechanism, or compound; provided that such nondisclosure shall not apply to information that is necessary for use by duly authorized officers or employees of state or federal government in carrying out their responsibilities under these regulations or applicable federal or state law. If no claim is made at the time of submission, the commissioner may make the information available to the public without further notice. Claims of confidentiality for the following information shall be denied:	While the language at § <del>60360</del> 1.A is not verbatim to the federal definition, the intent of the federal rule is preserved; that being, information that is not determined to require confidentiality shall be made available to the public.	Reviewed; no issues found.
136	40 CFR 144.5 (b) (See also 145.11(a)(1))	Claims of confidentiality for the following information will be denied: (1) The name and address of any permit applicant or permittee; (2) Information which deals with the existence, absence, or level of contaminants in drinking water.	§ <del>60360</del> 3.I through <del>60360</del> 3.I.2	1. the name and address of any permit applicant or permittee; and 2. information which deals with the existence, absence, or level of contaminants in drinking water or zones other than the approved injection zone.	<u>The following language has been added at §3603.I.2: or zones other than the approved injection zone.</u>  <u>This language is more restrictive than the federal equivalent as it refers to the presence of contaminants in any formation outside of the approved injection zone rather than just the USDW or in the drinking water.</u>	EPA: legal staff input on the addition of "other than the approved injection zone" is requested. This should be acceptable, since the injection zone will by definition not be a USDW. August 2020 review: rule text addresses comment; no concerns for stringency.
<b>40 CFR 144.6 Classification of wells</b>						
137	40 CFR 144.6 (See also 145.11(a)(2))	Injection wells are classified as follows:				

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt "optional" program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
137	40 CFR 144.6(f) (See also 145.11(a)(2))	<i>Class VI.</i> Wells that are not experimental in nature that are used for geologic sequestration of carbon dioxide beneath the lowermost formation containing a USDW; <del>or, wells used for geologic sequestration of carbon dioxide that have been granted a waiver of the injection depth requirements pursuant to requirements at § 146.95 of this chapter;</del> or, wells used for geologic sequestration of carbon dioxide that have received an expansion to the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption pursuant to §§ 146.4 of this chapter and 144.7(d).	§ <del>603</del> 603.C.1	1. Class VI. Wells not experimental in nature that are used for geologic sequestration of carbon dioxide beneath the lowermost formation containing a USDW; or wells used for geologic sequestration of carbon dioxide that have received an expansion to the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption pursuant to the appropriate parts of § <del>603</del> 603.F.	The struck-out text of 40 CFR 144.6(f) will not be adopted. Waivers of the injection depth requirements for Class VI wells will not be granted.	Reviewed; no issues found.
<b>40 CFR 144.7 Identification of underground sources of drinking water and exempted aquifers</b>						
138	40 CFR 144.7(a) (See also 145.11(a)(3))	The Director may identify (by narrative description, illustrations, maps, or other means) and shall protect as underground sources of drinking water, all aquifers and parts of aquifers which meet the definition of “underground source of drinking water” in § 144.3, except to the extent there is an applicable aquifer exemption under paragraph (b) of this section or an expansion to the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption for the exclusive purpose of Class VI injection for geologic sequestration under paragraph (d) of this section. Other than EPA approved aquifer exemption expansions that meet the criteria set forth in § 146.4(d) of this chapter, new aquifer exemptions shall not be issued for Class VI injection wells. Even if an aquifer has not been specifically identified by the Director, it is an underground source of drinking water if it meets the definition in § 144.3.	§ <del>603</del> 603.F.1	1. The commissioner may identify (by narrative description, illustrations, maps, or other means) and shall protect as an underground source of drinking water, all aquifers or parts of aquifers which meet the definition of an underground source of drinking water, except where there is an applicable aquifer exemption under §§ <del>603</del> 603.F.2 and 4, or an expansion to the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption for the exclusive purpose of Class VI injection for geologic sequestration under § <del>403</del> 3603.F.4. Other than approved aquifer exemption expansions that meet the criteria set forth in § <del>403</del> 3603.F.2.d, new aquifer exemptions shall not be issued for Class VI injection wells. Even if an aquifer has not been specifically identified by the commissioner, it is an underground source of drinking water if it meets the definition.		Text is similar, with no impact on stringency.  Note, there is a typo (errant period) in state rule text.  Should the references to §103.F.4. and §103.F.2.d refer to §603?  August 2020 review: revised citations address the above comments; state provision is now similar to CFR.
139	40 CFR 144.7(b)(1) (See also 145.11(a)(3))	The Director may identify (by narrative description, illustrations, maps, or other means) and describe in geographic and/or geometric terms (such as vertical and lateral limits and gradient) which are clear and definite, all aquifers or parts thereof which the Director proposes to designate as exempted aquifers using the criteria in 40 CFR 146.4.	§ <del>603</del> 603.F.2	2. After notice and opportunity for a public hearing the commissioner may identify (by narrative description, illustrations, maps, or other means) and describe in geographic and/or geometric terms (such as vertical and lateral limits and gradient) which are clear and definite, all aquifers or parts thereof which the commissioner proposes to designate as exempted aquifers if they meet the following criteria:	In addition to the text at 40 CFR 144.7(b)(1), the following language has been added at § <del>603</del> 603.F.2: after notice and opportunity for a public hearing.	Reviewed; no issues found.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
140	40 CFR 144.7(b)(2) (See also 145.11(a)(3))	No designation of an exempted aquifer submitted as part of a UIC program shall be final until approved by the Administrator as part of a UIC program. No designation of an expansion to the areal extent of a Class II enhanced oil recovery or enhanced gas recovery aquifer exemption for the exclusive purpose of Class VI injection for geologic sequestration shall be final until approved by the Administrator as a revision to the applicable Federal UIC program under part 147 or as a substantial revision of an approved State UIC program in accordance with § 145.32 of this chapter.	§ <del>603</del> 603.F.3	3. No designation of an exempted aquifer submitted as part of the state's UIC program shall be final until approved by the USEPA. No designation of an expansion to the areal extent of a Class II enhanced oil recovery or enhanced gas recovery aquifer exemption for the exclusive purpose of Class VI injection for geologic sequestration shall be final until approved by the USEPA as a substantial revision of the state's UIC program in accordance with 40 CFR 145.32.		Text is similar, with no impact on stringency.
141	40 CFR 144.7(d) (See also 145.11(a)(3))	<i>Expansion to the areal extent of existing Class II aquifer exemptions for Class VI wells. <del>Owners or</del> operators of Class II enhanced oil recovery or enhanced gas recovery wells may request that the Director approve an expansion to the areal extent of an aquifer exemption already in place for a Class II enhanced oil recovery or enhanced gas recovery well for the exclusive purpose of Class VI injection for geologic sequestration. Such requests must be treated as a revision to the applicable Federal UIC program under part 147 or as a substantial program revision to an approved State UIC program under § 145.32 of this chapter and will not be final until approved by EPA.</i>	§ <del>603</del> 603.F.4	4. Expansion to the Areal Extent of Existing Class II Aquifer Exemptions for Class VI Wells. Operators of Class II enhanced oil recovery or enhanced gas recovery wells may request that the commissioner approve an expansion to the areal extent of an aquifer exemption already in place for a Class II enhanced oil recovery or enhanced gas recovery well for the exclusive purpose of Class VI injection for geologic sequestration. Such requests are treated as a substantial program revision to the state's UIC program and will not be final until approved by USEPA.	<u>The struck-out text of 40 CFR 144.7(d) will not be adopted. Based on the §3601 definitions of operator and owner, the language at §3603.F.4 will not impact the stringency of state requirements compared to the federal rule.</u>	Text limits this provision to operators, not owners; no impact on stringency, given the definition of these terms.  August 2020 review: no impact on stringency.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt "optional" program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
142	40 CFR 144.7(d)(1) (See also 145.11(a)(3))	The <del>owner or</del> operator of a Class II enhanced oil recovery or enhanced gas recovery well that requests an expansion of the areal extent of an existing aquifer exemption for the exclusive purpose of Class VI injection for geologic sequestration must define (by narrative description, illustrations, maps, or other means) and describe in geographic and/or geometric terms (such as vertical and lateral limits and gradient) that are clear and definite, all aquifers or parts thereof that are requested to be designated as exempted using the criteria in § 146.4 of this chapter.	§ <del>603</del> 603.F.4.a	a. The operator of a Class II enhanced oil recovery or enhanced gas recovery well that requests an expansion of the areal extent of an existing aquifer exemption for the exclusive purpose of Class VI injection for geologic sequestration must define (by narrative description, illustrations, maps, or other means) and describe in geographic and/or geometric terms (such as vertical and lateral limits and gradient) that are clear and definite, all aquifers or parts thereof that are requested to be designated as exempted using the criteria in § <del>103</del> 603.F.2.d.	<u>The struck-out text of 40 CFR 144.7(d)(1) will not be adopted. Based on the §3601 definitions of operator and owner, the language at §3603.F.4 will not impact the stringency of state requirements compared to the federal rule.</u>	Text limits this provision to operators, not owners; no impact on stringency, given the definition of these terms.  Should the reference to §103.F.2.d refer to §603? August 2020 review: revised citation addresses the above comment. EPA August review: However, the July LA rule text should be corrected to read “§603.F.2.d” instead of “§103.F.2.d” EPA September Review: The added text addresses August comment; EPA has no further concerns regarding stringency.
143	40 CFR 144.7(d)(2) (See also 145.11(a)(3))	In evaluating a request to expand the areal extent of an aquifer exemption of a Class II enhanced oil recovery or enhanced gas recovery well for the purpose of Class VI injection, the Director must determine that the request meets the criteria for exemptions in § 146.4. In making the determination, the Director shall consider:	§ <del>603</del> 603.F.4.b	b. In evaluating a request to expand the areal extent of an aquifer exemption of a Class II enhanced oil recovery or enhanced gas recovery well for the purpose of Class VI injection, the commissioner must determine that the request meets the criteria for exemptions. In making the determination, the commissioner shall consider:		Text is similar, with no impact on stringency.
144	40 CFR 144.7(d)(2)(i) (See also 145.11(a)(3))	Current and potential future use of the USDWs to be exempted as drinking water resources;	§ <del>603</del> 603.F.4.b.i	i. current and potential future use of the USDWs to be exempted as drinking water resources;		Text is identical.
145	40 CFR 144.7(d)(2)(ii) (See also 145.11(a)(3))	The predicted extent of the injected carbon dioxide plume, and any mobilized fluids that may result in degradation of water quality, over the lifetime of the GS project, as informed by computational modeling performed pursuant to § 146.84(c)(1), in order to ensure that the proposed injection operation will not at any time endanger USDWs including non-exempted portions of the injection formation;	§ <del>603</del> 603.F.4.b.i i	ii. the predicted extent of the injected carbon dioxide plume, and any mobilized fluids that may result in degradation of water quality, over the lifetime of the project, as informed by computational modeling, in order to ensure that the proposed injection operation will not at any time endanger USDWs including non-exempted portions of the injection formation; and		Text is similar, with no impact on stringency.

<b>SUBPART C—AUTHORIZATION OF UNDERGROUND INJECTION BY RULE</b>						
<b>40 CFR 144.22 Existing Class II enhanced recovery and hydrocarbon storage wells.</b>						

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt "optional" program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
188	40 CFR 144.22(b) (See also 145.11(a)(9))	<i>Duration of well authorization by rule.</i> Well authorization under this section expires upon the effective date of a permit issued pursuant to § 144.19, § 144.25, § 144.31, § 144.33 or § 144.34; after plugging and abandonment in accordance with an approved plugging and abandonment plan pursuant to §§ 144.28(c) and 146.10 of this chapter; and upon submission of a plugging and abandonment report pursuant to § 144.28(k); or upon conversion in compliance with § 144.28(j).	§603603.E.1.a	1. Class VI wells cannot be authorized by rule to inject carbon dioxide. Owners or operators of Class VI wells must obtain a permit.  a. Any authorization by rule for an existing Class II enhanced recovery or hydrocarbon storage well shall expire upon the effective date of a Class VI permit issued pursuant to §603603.G, or well plug and abandonment according to an approved plug and abandonment plan, or upon well conversion.	Authorization by rule for Class VI wells will be prohibited.	Reviewed; no issues found.
<b>SUBPART D—AUTHORIZATION BY PERMIT</b>						
<b>40 CFR 144.31 Application for a permit; authorization by permit.</b>						
189	40 CFR 144.31(a) (See also 145.11(a)(10))	Permit application. Unless an underground injection well is authorized by rule under subpart C of this part, all injection activities including construction of an injection well are prohibited until the owner or operator is authorized by permit. An owner or operator of a well currently authorized by rule must apply for a permit under this section unless well authorization by rule was for the life of the well or project. Authorization by rule for a well or project for which a permit application has been submitted terminates for the well or project upon the effective date of the permit. Procedures for applications, issuance and administration of emergency permits are found exclusively in § 144.34. A RCRA permit applying the standards of part 264, subpart C of this chapter will constitute a UIC permit for hazardous waste injection wells for which the technical standards in part 146 of this chapter are not generally appropriate.	§603603.B	B. Prohibition of Unauthorized Injection. Any underground injection, except as authorized by a permit or rule, is prohibited after the effective date of these regulations. Construction or operation of any well required to have a permit under these regulations is prohibited until the permit has been issued.	While the language at §603605.B is not verbatim to 40 CFR 144.31(a), the intent of the federal rule is preserved: that being, all injection activities are prohibited unless authorized by a permit.	Reviewed; no issues found.
190	40 CFR 144.31(b) (See also 145.11(a)(10))	Who applies? When a facility or activity is owned by one person but is operated by another person, it is the operator's duty to obtain a permit.	§603605.D	D. Who Applies. It is the duty of the owner of a facility or activity to submit an application for permit. When a facility is owned by one person and operated by another, it is the operator's duty to obtain a permit.	While the language at §603605.D is not verbatim to 40 CFR 144.31(b), the intent of the federal rule is preserved: that being, it remains the operator's duty to obtain a permit if the facility is owned by another person.	Reviewed; no issues found.
191	40 CFR 144.31(c) (See also 145.11(a)(10))	Time to apply. Any person who performs or proposes an underground injection for which a permit is or will be required shall submit an application to the Director in accordance with the UIC program as follows:	§603605.C.2	2. Time to Apply. Any person who performs or proposes an underground injection for which a permit is or will be required shall submit an application to the commissioner.		Text is similar, with no impact on stringency.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt "optional" program elements such as authorization by rule.

240	40 CFR 144.38(b) (See also 145.11(a)(16))	Automatic transfers. As an alternative to transfers under paragraph (a) of this section, any UIC permit for a well not injecting hazardous waste or injecting carbon dioxide for geologic sequestration may be automatically transferred to a new permittee if:	N/A		Automatic transfer of permits for Class VI wells will be prohibited.	Reviewed; no issues found. (§609.L.4 allows transfers only upon approval by the commissioner.)
241	40 CFR 144.38(b)(1) (See also 145.11(a)(16))	The current permittee notifies the Director at least 30 days in advance of the proposed transfer date referred to in paragraph (b)(2) of this section;	N/A		See above.	Reviewed; no issues found.
242	40 CFR 144.38(b)(2) (See also 145.11(a)(16))	The notice includes a written agreement between the existing and new permittees containing a specific date for transfer or permit responsibility, coverage, and liability between them, and the notice demonstrates that the financial responsibility requirements of § 144.52(a)(7) will be met by the new permittee; and	N/A		See above.	Reviewed; no issues found.
243	40 CFR 144.38(b)(3) (See also 145.11(a)(16))	The Director does not notify the existing permittee and the proposed new permittee of his or her intent to modify or revoke and reissue the permit. A modification under this paragraph may also be a minor modification under § 144.41. If this notice is not received, the transfer is effective on the date specified in the agreement mentioned in paragraph (b)(2) of this section.	N/A		See above.	Reviewed; no issues found.
<b>40 CFR 144.39 Modification or revocation and reissuance of permits.</b>						

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
244	40 CFR 144.39 (See also 145.11(a)(17))	When the Director receives any information (for example, inspects the facility, receives information submitted by the permittee as required in the permit (see § 144.51 of this chapter), receives a request for modification or revocation and reissuance under § 124.5, or conducts a review of the permit file) he or she may determine whether or not one or more of the causes listed in paragraphs (a) and (b) of this section for modification or revocation and reissuance or both exist. If cause exists, the Director may modify or revoke and reissue the permit accordingly, subject to the limitations of paragraph (c) of this section, and may request an updated application if necessary. <del>When a permit is modified, only the conditions subject to modification are reopened.</del> If a permit is revoked and reissued, the entire permit is reopened and subject to revision and the permit is reissued for a new term. See § 124.5(c)(2) of this chapter. If cause does not exist under this section or § 144.41 of this chapter, the Director shall not modify or revoke and reissue the permit. If a permit modification satisfies the criteria in § 144.41 for “minor modifications” the permit may be modified without a draft permit or public review. Otherwise, a draft permit must be prepared and other procedures in part 124 must be followed.	§643613.B through 643613.B.5	B. Permit Actions 1. The permit may be modified, revoked and reissued, or terminated for cause. <u>The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance, does not stay any permit condition.</u> 2. The permittee shall furnish to the commissioner, within 30 days, any information which the commissioner may request to determine whether cause exists for modifying, revoking and reissuing, or terminating a permit, or to determine compliance with the permit. The permittee shall also furnish to the commissioner, upon request, copies of records required to be kept by the permit. 3. The commissioner may, upon his own initiative or at the request of any interested person, review any permit to determine if cause exists to modify, revoke and reissue, or terminate the permit for the reasons specified in §§643613.C, D, and E. All requests shall be in writing and shall contain facts or reasons supporting the request. 4. If the commissioner decides the request is not justified, he shall send the person making the request a brief written response giving a reason for the decision. Denials of requests for modification, revocation and reissuance, or termination are not subject to public notice, comment, or hearings. 5. If the commissioner decides to modify or revoke and reissue a permit under §§643613.C, D, and E, he shall prepare a draft permit under §643611.C incorporating the proposed changes. <u>When a permit is modified, the entire permit is reopened and is subject to revision.</u> The commissioner may request additional information and, in the case of a modified permit, may require the submission of an updated permit application. In the case of revoked and reissued permits, the commissioner shall require, if necessary, the submission of a new application.	While the language at §643613.B through 643613.B.5 is not verbatim to 40 CFR 144.39, the intent of the federal rule is preserved: that being, permits may be reviewed for the purpose of modification, revocation, reissuance, or termination, and the commissioner may modify, revoke, reissue, or terminate accordingly if cause exists.  The struck-out text of 40 CFR 144.39 will not be adopted. When a permit is modified, the entire permit <del>will may</del> be reopened and subject to revision.  <u>The following emphasized language has been added at §3613.B.5: When a permit is modified, the entire permit is reopened and is subject to revision.</u>	Text does not specify that the entire permit is reopened and subject to revision (this is struck out, and reopening the entire permit would not limit stringency), and that the permit is reissued for a new term (which is not an issue, as Class VI permits are for the life of the facility and subject to 5 year review/AoR reevaluation).  Note that 613.B.1 also includes the following text: “The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance, does not stay any permit condition.” (No impact on stringency.)  August 2020 review: no concerns for stringency.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
245	40 CFR 144.39(a) (See also 145.11(a)(17))	Causes for modification. The following are causes for modification. <del>For Class I hazardous waste injection wells, Class II, Class III or Class VI wells the following may be causes for revocation and reissuance as well as modification; and for all other wells the following may be cause for revocation or reissuance as well as modification when the permittee requests or agrees.</del>	§ <del>64</del> 3613.C.1	1. The following are causes for modification and may be causes for revocation and reissuance of permits.	The struck-out text of 40 CFR 144.39(a) will not be adopted.	Reviewed; no issues found.
246	40 CFR 144.39(a)(1) (See also 145.11(a)(17))	<i>Alterations.</i> There are material and substantial alterations or additions to the permitted facility or activity which occurred after permit issuance which justify the application of permit conditions that are different or absent in the existing permit.	§ <del>64</del> 3613.C.1.a	a. Alterations. There are material and substantial alterations or additions to the permitted facility or activity which occurred after permit issuance which justify the application of permit conditions that are different or absent in the existing permit.		Text is identical.
247	40 CFR 144.39(a)(2) (See also 145.11(a)(17))	<i>Information.</i> The Director has received information. Permits other than for Class II and III wells may be modified during their terms for <del>this cause only if the information was not available at the time of permit issuance (other than revised regulations, guidance, or test methods)</del> and would have justified the application of different permit conditions at the time of issuance. <del>For UIC area permits (§ 144.33), this cause shall include any information indicating that cumulative effects on the environment are unacceptable.</del>	§ <del>64</del> 3613.C.1.b	b. Information. The commissioner has received information pertinent to the permit that would have justified the application of different permit conditions at the time of issuance.	While the language at § <del>64</del> 3613.C.1.b is not verbatim to 40 CFR 144.39(a)(2), the intent of the federal rule is preserved: that being, that information not available at the time of permit issuance is a valid cause for modification and may be a valid cause for revocation and reissuance.  The struck-out text of 40 CFR 144.39(a)(2) will not be adopted.	Text does not specify that this applies only if the information was not available at the time of issuance.  EPA August Review: While the text is not verbatim, stringency should not be impacted because the Director retains the ability to modify permits based on any available information, such as information that was not available at the time of permit issuance.
248	40 CFR 144.39(a)(3) (See also 145.11(a)(17))	<i>New regulations.</i> The standards or regulations on which the permit was based have been changed by promulgation of new or amended standards or regulations or by judicial decision after the permit was issued. Permits other than for Class I hazardous waste injection wells, Class II, Class III or Class VI wells may be modified during their permit terms for this cause only as follows:	§ <del>64</del> 3613.C.1.c.i	i. The standards or regulations on which the permit was based have been changed by promulgation of amended standards or regulations or by judicial decision after the permit was issued, <del>and conformance with the changed standards or regulations is necessary for the protection of the health or safety of the public or the environment.</del> Permits for Class VI wells may be modified during their terms when:	While the language at § <del>64</del> 3613.C.1.c.i is not verbatim to 40 CFR 144.39(a)(3), the intent of the federal rule is preserved: that being, that changes in standards or regulations due to amended regulations or judicial decision after the permit was issued are cause for permit modification.	Text as written appears to require permit modification only if conformance is necessary for the protection of the health or safety of the public or the environment; suggest clarification to better reflect the intent as described.  August 2020 review: first sentence is now similar to CFR. No concerns for stringency.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt "optional" program elements such as authorization by rule.

357		<i>Confining bed</i> means a body of impermeable or distinctly less permeable material stratigraphically adjacent to one or more aquifers.	<del>§3601.A</del> N/A	<i>Confining Bed</i> —a body of impermeable or distinctly less permeable material stratigraphically adjacent to one or more aquifers.		Note that the draft rule text reads “Confining Bed—a body of impermeable or distinctly less permeable material stratigraphically adjacent to one or more aquifers.” Text is similar, with no impact on stringency.  August 2020 review: no concerns for stringency.
358		<i>Confining zone</i> means a geological formation, group of formations, or part of a formation that is capable of limiting fluid movement above an injection zone.	<del>§3601.A</del> N/A	<i>Confining Zone</i> —a geological formation, group of formations, or part of a formation stratigraphically overlying the injection zone that acts as a barrier to fluid movement above an injection zone.		No state equivalent. Confining zone is defined at §601.A.  August 2020 review: no concerns for stringency.
359		<i>Conventional mine</i> means an open pit or underground excavation for the production of minerals.	N/A			No state equivalent.
<del>36060</del>		<i>Disposal well</i> means a well used for the disposal of waste into a subsurface stratum.	<del>§3601.A</del> N/A	<i>Disposal Well</i> —a well used for the disposal of waste into a subsurface stratum.		Note that the draft rule text at 601.A reads Disposal Well—a well used for the disposal of waste into a subsurface stratum.” Text is identical to CFR.  August 2020 review: no concerns for stringency.
<del>36161</del>		<i>Effective date</i> of a UIC program means the date that a State UIC program is approved or established by the Administrator.	N/A			N/A. This is not required of state programs.
<del>36262</del>		<i>Experimental technology</i> means a technology which has not been proven feasible under the conditions in which it is being tested.	<del>§60360</del> 1.A	Experimental Technology—a technology which has not been proven feasible under the conditions in which it is being tested		Text is identical.
363		<i>Fault</i> means a surface or zone of rock fracture along which there has been displacement.	<del>§60360</del> 1.A	Fault—a surface or zone of rock fracture along which there has been displacement.		Text is identical.
364		<i>Flow rate</i> means the volume per time unit given to the flow of gases or other fluid substance which emerges from an orifice, pump, turbine or passes along a conduit or channel.	<del>§60360</del> 1.A	Flow Rate—the volume per time unit given to the flow of <del>gases or other</del> fluid substance which emerges from an orifice, pump, turbine or passes along a conduit or channel.		Text omits “gases.”  August 2020 review: revised definition is similar to the CFR.
365		<i>Lithology</i> means the description of rocks on the basis of their physical and chemical characteristics.	<del>§60360</del> 1.A	Lithology—the description of rocks on the basis of their physical and chemical characteristics.		Text is identical.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
366		<i>Owner or operator</i> means the owner or operator of any facility or activity subject to regulation under the RCRA, UIC, NPDES, or 404 programs.	§603601.A	Operator—the person recognized as being responsible to the Office of Conservation for the well, site, facility, or activity subject to regulatory authority under these rules and regulations. The operator can, but need not be, the owner of the well, site, facility, or activity.  Owner—the person that owns any well, site, facility, or activity subject to regulation under the UIC program. The owner can, but need not be, the operator of the well, site, facility, or activity.		Text is similar, with no impact on stringency.
367		<i>Packer</i> means a device lowered into a well to produce a fluid-tight seal.	§603601.A	Packer—a device lowered into a well to produce a fluid tight seal within the casing.	The following language has been added: within the casing.	Text adds “within the casing.”  August 2020 review: no impact on stringency.
368		<i>Permit</i> means an authorization, license, or equivalent control document issued by EPA or an “approved State” to implement the requirements of this part and parts 124, 144, and 145. Permit does not include RCRA interim status (§122.23), UIC authorization by rule (§§144.21 to 144.26 and 144.15), or any permit which has not yet been the subject of final agency action, such as a “draft permit” or a “proposed permit.”	§3601.A	Permit—an authorization, license, or equivalent control document issued by the commissioner to implement the requirements of these regulations. Permit includes, but it is not limited to, area permits and emergency permits. Permit does not include UIC authorization by rule or any permit which has not yet been the subject of final agency action, such as a draft permit.		Text is similar, with no impact on stringency. Note: this row was omitted from the template provided to the state.  Note that the state noted elsewhere that emergency permits will not be issued for Class VI wells.  August 2020 review: added citation noted.
369		<i>Plugging</i> means the act or process of stopping the flow of water, oil or gas into or out of a formation through a borehole or well penetrating that formation.	§603601.A	Plugging—the act or process of stopping the flow of water, oil or gas into or out of a formation through a borehole or well penetrating that formation.		Text is identical.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
370		<i>Plugging record</i> means a systematic listing of permanent or temporary abandonment of water, oil, gas, test, exploration and waste injection wells, and may contain a well log, description of amounts and types of plugging material used, the method employed for plugging, a description of formations which are sealed and a graphic log of the well showing formation location, formation thickness, and location of plugging structures.	§603601.A	<i>Plugging Record</i> — a systematic listing of permanent or temporary abandonment of water, oil, gas, test, exploration and waste injection wells, and may contain a well log, description of amounts and types of plugging material used, the method employed for plugging, a description of formations which are sealed and a graphic log of the well showing formation location, formation thickness, and location of plugging structures. <i>Plugging Record</i> — a systematic listing of permanent or temporary abandonment of water, oil, gas, test, exploration, and waste injection wells.		Text omits “and may contain a well log, description of amounts and types of plugging material used, the method employed for plugging, a description of formations which are sealed and a graphic log of the well showing formation location, formation thickness, and location of plugging structures.” However, Class VI plugging report requirements are similar to CFR; see 40 CFR 146.92(d)/§631.A.5.  August 2020 review: revised definition is similar to the CFR.
371		<i>Pressure</i> means the total load or force per unit area acting on a surface.	§603601.A	Pressure—the total load or force per unit area acting on a surface.		Text is identical.
372		<i>Sole or principal source aquifer</i> means an aquifer which has been designated by the Administrator pursuant to section 1424 (a) or (e) of the SDWA.	§603601.A	Sole or Principal Source Aquifer—an aquifer which is the sole or principal drinking water source for an area and which, if contaminated, would create a significant hazard to public health.		Text is similar, with no impact on stringency.
373		<i>Subsidence</i> means the lowering of the natural land surface in response to: Earth movements; lowering of fluid pressure; removal of underlying supporting material by mining or solution of solids, either artificially or from natural causes; compaction due to wetting (Hydrocompaction); oxidation of organic matter in soils; or added load on the land surface.	N/A			No state equivalent.
374		<i>Surface casing</i> means the first string of well casing to be installed in the well.	§603601.A	Surface Casing—the first string of casing to be installed in the well, excluding conductor casing.		Text excludes conductor casing.
375		<i>Well plug</i> means a watertight and gastight seal installed in a borehole or well to prevent movement of fluids.	§603601.A	Well Plug—a fluid-tight seal installed in a borehole or well to prevent movement of fluids.		Text is similar, with no impact on stringency.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
376		<i>Well stimulation</i> means several processes used to clean the well bore, enlarge channels, and increase pore space in the interval to be injected thus making it possible for wastewater to move more readily into the formation, and includes (1) surging, (2) jetting, (3) blasting, (4) acidizing, (5) hydraulic fracturing.	§ <del>60360</del> 1.A	Well Stimulation—several processes used to clean the well bore, enlarge channels, and increase pore space in the interval to be injected thus making it possible for fluids to move more readily into the formation, and includes, but may not be limited to: a. surging; b. jetting; c. blasting; d. acidizing; or e. hydraulic fracturing.	<del>The struck-out text of the federal definition will not be adopted and will be substituted with “fluids.” The following language has been also added: but may not be limited to.</del>	LA did not indicate which part of the text was struck out. Text appears similar. August 2020 revision: clarification noted. No concerns for stringency.
377		<i>Well monitoring</i> means the measurement by on-site instruments or laboratory methods, of the quality of water in a well	§ <del>60360</del> 1.A	Well monitoring—the measurement by on-site instruments or laboratory methods, of the quality of water in a well.		Text is identical.
<b>40 CFR 146.4 Criteria for exempted aquifers</b>						
378	40 CFR 146.4	An aquifer or a portion thereof which meets the criteria for an “underground source of drinking water” in §146.3 may be determined under §144.7 of this chapter to be an “exempted aquifer” for Class I–V wells if it meets the criteria in paragraphs (a) through (c) of this section. Class VI wells must meet the criteria under paragraph (d) of this section:	§ <del>60360</del> 3.F.2	After notice and opportunity for a public hearing the commissioner may identify (by narrative description, illustrations, maps, or other means) and describe in geographic and/or geometric terms (such as vertical and lateral limits and gradient) which are clear and definite, all aquifers or parts thereof which the commissioner proposes to designate as exempted aquifers if they meet the following criteria	<u>While the language at §3603.F.2 is not verbatim to 40 CFR 146.4, the intent of the federal rule is preserved; that being, introducing the necessary criteria for designation of exempted aquifers.</u>	Text is similar, with no impact on stringency. LA rule text added to table in review.  August 2020 review: no concerns for stringency.
379	40 CFR 146.4(a)	It does not currently serve as a source of drinking water; and	§ <del>60360</del> 3.F.2.a	a. the aquifer does not currently serve as a source of drinking water; and		Text is similar, with no impact on stringency.
380	40 CFR 146.4(b)	It cannot now and will not in the future serve as a source of drinking water because:	§ <del>60360</del> 3.F.2.b	b. the aquifer cannot now and will not in the future serve as a source of drinking water because:		Text is identical.
381	40 CFR 146.4(b)(1)	It is mineral, hydrocarbon or geothermal energy producing, or can be demonstrated by a permit applicant as part of a permit application for a <del>Class II</del> or III operation to contain minerals or hydrocarbons that considering their quantity and location are expected to be commercially producible.	§ <del>60360</del> 3.F.2.b.i	i. it is mineral, hydrocarbon or geothermal energy producing or can be demonstrated by a permit applicant as part of a permit application for a Class III operation to contain minerals or hydrocarbons that considering their quantity and location are expected to be commercially producible;	The struck-out text of 40 CFR 146.4(b)(1) will not be adopted as Louisiana does not permit solution mining wells as Class II operations.	Reviewed; no issues found.
382	40 CFR 146.4(b)(2)	It is situated at a depth or location which makes recovery of water for drinking water purposes economically or technologically impractical;	§ <del>60360</del> 3.F.2.b.i i	ii. it is situated at a depth or location which makes recovery of water for drinking water purposes economically or technologically impractical;		Text is identical.
383	40 CFR 146.4(b)(3)	It is so contaminated that it would be economically or technologically impractical to render that water fit for human consumption; or	§ <del>60360</del> 3.F.2.b.i ii	iii. it is so contaminated that it would be economically or technologically impractical to render that water fit for human consumption; or		Text is identical.
384	40 CFR 146.4(b)(4)	It is located over a Class III well mining area subject to subsidence or catastrophic collapse; or	§ <del>60360</del> 3.F.2.b.i v	iv. it is located over a Class III well mining area subject to subsidence or catastrophic collapse; or		Text is identical.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. 389	40 CFR 146.4(d)(3)	It is not reasonably expected to supply a public water system.	§ <del>603</del> 603.F.2.d.ii	iii. it is not reasonably expected to supply a public water system.		Text is identical.
<b>Subpart H - Criteria and Standards Applicable to Class VI Wells</b>						
<b>40 CFR 146.81 Applicability.</b>						
390	40 CFR 146.81(a)	This subpart establishes criteria and standards for underground injection control programs to regulate any Class VI carbon dioxide geologic sequestration injection wells.	§ <del>603</del> 603.A through <del>603</del> 603.A.1	A. Applicability. These rules and regulations apply to all owners and operators of proposed and existing Class VI injection wells and projects in the state of Louisiana.  1. The commissioner shall administer the provisions of Act 517 and these regulations promulgated thereunder for geologic sequestration of carbon dioxide.		Text is similar, with no impact on stringency.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt "optional" program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
391	40 CFR 146.81(b)	This subpart applies to any wells used to inject carbon dioxide specifically for the purpose of geologic sequestration, i.e., the long-term containment of a gaseous, liquid, or supercritical carbon dioxide stream in subsurface geologic formations.	§603603.A.2	2. The provisions of this Chapter only apply to geologic sequestration of carbon dioxide in underground reservoirs as defined in §603601 above. The geologic sequestration of carbon dioxide is not permitted in solution-mined salt caverns under these provisions.	<p><u>While the language at §3603.A.2 is not verbatim to 40 CFR 146.81(b), the intent of the federal rule is preserved; that being, the introduction of provisions pertaining to injection of carbon dioxide for the purposes of long term containment. The language at §3603.A.2 does not specify the phase of the carbon dioxide stream, however, all phases are referenced in the definition in §3601.</u></p> <p><u>The following language has been added at §3603.A.2: the geologic sequestration of carbon dioxide is not permitted in solution-mined salt caverns under these provisions.</u></p>	<p>Text does not specify the phase of the carbon dioxide stream (although all phases are referenced in definition in §601). Adds stipulation about salt caverns.</p> <p>August 2020 review: clarification is noted; no concerns for stringency.</p>
392	40 CFR 146.81(c)	This subpart also applies to owners or operators of permit- or rule-authorized Class I, Class II, or Class V experimental carbon dioxide injection projects who seek to apply for a Class VI geologic sequestration permit for their well or wells. Owners or operators seeking to convert existing Class I, Class II, or Class V experimental wells to Class VI geologic sequestration wells must demonstrate to the Director that the wells were engineered and constructed to meet the requirements at 40 CFR 146.86(a) and ensure protection of USDWs, in lieu of requirements at 40 CFR 146.86(b) and 146.87(a). By December 10, 2011, owners or operators of either Class I wells previously permitted for the purpose of geologic sequestration or Class V experimental technology wells no longer being used for experimental purposes that will continue injection of carbon dioxide for the purpose of GS must apply for a Class VI permit. A converted well must still meet all other requirements under part 146.	§603603.A.3	3. This provisions of this Chapter also apply to owners or operators of permit- or rule-authorized Class I, Class II, or Class V experimental carbon dioxide injection projects who seek to apply for a Class VI geologic sequestration permit for their well or wells. Owners or operators seeking to convert existing Class I, Class II, or Class V experimental wells to Class VI geologic sequestration wells must demonstrate to the <del>Director</del> commissioner that the wells were engineered and constructed to meet the requirements at §643617.A.1 and ensure protection of USDWs, in lieu of requirements at §643617.A.2 and §643617.B.1 By December 10, 2011, owners or operators of either Class I wells previously permitted for the purpose of geologic sequestration or Class V experimental technology wells no longer being used for experimental purposes that will continue injection of carbon dioxide for the purpose of GS must apply for a Class VI permit. A converted well must still meet all other requirements under this Chapter.		<p>Text is similar, with no impact on stringency.</p> <p>EPA August Review: Should Reg text at 603.A.3 say Commissioner instead of Director?</p> <p>EPA September Review: Edit addresses EPA's August Comment. No further concerns.</p>

393	40 CFR 146.81(d)	<i>Definitions.</i> The following definitions apply to this subpart. To the extent that these definitions conflict with those in 40 CFR 144.3 or 146.3, these definitions govern for Class VI wells:	§ <del>60</del> 3601.A	A. The following definitions apply to all regulations in this Chapter. Terms not defined in this Section for Class VI wells have the meaning given by R.S. (1950) Title 30, Section 1103.	<u>While the language at §3601.A is not verbatim to 40 CFR 146.81(d), the intent of the federal rule is preserved; that being, the introduction of definitions.</u>  <u>The language regarding potential conflicting definitions will not be adopted since §3601.A is the only section of definitions in the state rule and pertain to Class VI wells.</u>	Text does not cover conflicting definitions.  August 2020 review: clarification is noted; no concerns for stringency.
394		Area of review means the region surrounding the geologic sequestration project where USDWs may be endangered by the injection activity. The area of review is delineated using computational modeling that accounts for the physical and chemical properties of all phases of the injected carbon dioxide stream and displaced fluids, and is based on available site characterization, monitoring, and operational data as set forth in § 146.84.	§ <del>60</del> 3601.A	Area of Review—the region surrounding the geologic sequestration project where USDWs may be endangered by the injection activity, and is delineated using computational modeling that accounts for the physical and chemical properties of all phases of the injected carbon dioxide stream and displaced fluids, and is based on available site characterization, monitoring, and operational data as set forth in §§ <del>64</del> 3615.B. and § <del>64</del> 3615.C.		Text is similar, with no impact on stringency.
395		Carbon dioxide plume means the extent underground, in three dimensions, of an injected carbon dioxide stream.	§ <del>60</del> 3601.A	Carbon Dioxide Plume—the extent underground, in three dimensions, of an injected carbon dioxide stream.		Text is identical.
396		Carbon dioxide stream means carbon dioxide that has been captured from an emission source (e.g., a power plant), plus incidental associated substances derived from the source materials and the capture process, and any substances added to the stream to enable or improve the injection process. This subpart does not apply to any carbon dioxide stream that meets the definition of a hazardous waste under 40 CFR part <del>264</del> 361.	§ <del>60</del> 3601.A	Carbon Dioxide Stream—the carbon dioxide that has been captured from an emission source (e.g., a power plant), plus incidental associated substances derived from the source materials and the capture process, and any substances added to the stream to enable or improve the injection process. This meaning does not apply to any carbon dioxide stream meeting the definition of a hazardous waste under Title 40, Code of Federal Regulations, Part <del>264</del> 361.		Text is similar, with no impact on stringency.
397		Confining zone means a geologic formation, group of formations, or part of a formation stratigraphically overlying the injection zone(s) that acts as barrier to fluid movement. <del>For Class VI wells operating under an injection depth waiver, confining zone means a geologic formation, group of formations, or part of a formation stratigraphically overlying and underlying the injection zone(s).</del>	§ <del>60</del> 3601.A	Confining Zone—a geological formation, group of formations, or part of a formation stratigraphically overlying the injection zone that acts as a barrier to fluid movement above an injection zone.	<u>The struck-out text of the federal definition will not be adopted. Waivers of the injection depth requirements for Class VI wells will not be granted.</u>	Reviewed; no issues found.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

398		Corrective action means the use of Director-approved methods to ensure that wells within the area of review do not serve as conduits for the movement of fluids into underground sources of drinking water (USDW).	§ <del>60360</del> 1.A	Corrective Action—the use of UIC program-approved methods to ensure that wells within the area of review do not serve as conduits for the movement of fluids into USDWs.		Text is similar, with no impact on stringency.
399		Geologic sequestration means the long-term containment of a gaseous, liquid, or supercritical carbon dioxide stream in subsurface geologic formations. This term does not apply to carbon dioxide capture or transport.	§ <del>60360</del> 1.A	Geologic Sequestration—the long-term containment of a gaseous, liquid, or supercritical carbon dioxide stream in subsurface geologic formations. This term does not apply to carbon dioxide capture or transport.		Text is identical.
400		Geologic sequestration project means an injection well or wells used to emplace a carbon dioxide stream beneath the lowermost formation containing a USDW; or, wells used for geologic sequestration of carbon dioxide that have been granted a waiver of the injection depth requirements pursuant to requirements at § 146.95; or, wells used for geologic sequestration of carbon dioxide that have received an expansion to the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption pursuant to §§ 146.4 and 144.7(d) of this chapter. It includes the subsurface three-dimensional extent of the carbon dioxide plume, associated area of elevated pressure, and displaced fluids, as well as the surface area above that delineated region.	§ <del>60360</del> 1.A	Geologic Sequestration Project—an injection well or wells used to emplace a carbon dioxide stream beneath the lowermost formation containing a USDW; or wells used for geologic sequestration of carbon dioxide that have received an expansion to the areal extent of an existing Class II enhanced oil recovery or enhanced gas recovery aquifer exemption pursuant to § <del>60360</del> 3.F of this chapter. It includes the subsurface three-dimensional extent of the carbon dioxide plume, associated area of elevated pressure, and displaced fluids, as well as the surface area above that delineated region.		Text is similar, with no impact on stringency.
401		Injection zone means a geologic formation, group of formations, or part of a formation that is of sufficient areal extent, thickness, porosity, and permeability to receive carbon dioxide through a well or wells associated with a geologic sequestration project.	§ <del>60360</del> 1.A	Injection Zone—a geological formation, group of formations or part of a formation receiving fluids through a well. For Class VI projects, it must also be of sufficient areal extent, thickness, porosity, and permeability to receive carbon dioxide through a well or wells associated with a geologic sequestration project.		Text is similar, with no impact on stringency.
402		Post-injection site care means appropriate monitoring and other actions (including corrective action) needed following cessation of injection to ensure that USDWs are not endangered, as required under § 146.93.	§ <del>60360</del> 1.A	Post-Injection Site Care—the appropriate monitoring and other actions (including corrective action) needed following cessation of geologic sequestration injection to ensure that USDWs are not endangered, as required under § <del>60360</del> 33.		Text is similar, with no impact on stringency.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
403		Pressure front means the zone of elevated pressure that is created by the injection of carbon dioxide into the subsurface. For the purposes of this subpart, the pressure front of a carbon dioxide plume refers to a zone where there is a pressure differential sufficient to cause the movement of injected fluids or formation fluids into a USDW.	§603601.A	Pressure Front—the zone of elevated pressure in the subsurface created by injection where there is a pressure differential sufficient to cause the movement of injected fluids or formation fluids into a USDW.		Text is similar, with no impact on stringency.
404		Site closure means the point/time, as determined by the Director following the requirements under § 146.93, at which the owner or operator of a geologic sequestration site is released from post-injection site care responsibilities.	§603601.A	Site Closure—the point or time, as determined by the UIC program following the requirements under §6333633, at which the owner or operator of a geologic sequestration site is released from post-injection site care responsibilities.		Text is similar, with no impact on stringency.
405		Transmissive fault or fracture means a fault or fracture that has sufficient permeability and vertical extent to allow fluids to move between formations.	§603601.A	Transmissive Fault or Fracture—a fault or fracture that has sufficient permeability and vertical extent to allow fluids to move between formations.		Text is identical.
<b>40 CFR 146.82 Required Class VI permit information.</b>						
406	40 CFR 146.82	This section sets forth the information which must be considered by the Director in authorizing Class VI wells. For converted Class I, Class II, or Class V experimental wells, certain maps, cross-sections, tabulations of wells within the area of review and other data may be included in the application by reference provided they are current, readily available to the Director, and sufficiently identified to be retrieved.	§603607.A	A. The following minimum information required in §603607 shall be submitted with a permit application to construct a new Class VI well or convert any existing well for Class VI service. The applicant shall also refer to the appropriate application form for any additional information that may be required. For information already on file with the office of conservation, the commissioner may accept the required information by reference <u>provided they are current, readily available to the commissioner, and sufficiently identified to be retrieved.</u>		Text is similar, with no impact on stringency. Suggest clarifying that referenced information be current, readily available to the Director, and sufficiently identified to be retrieved.  August 2020 review: revision addresses the above comment. No concerns for stringency.
407	40 CFR 146.82(a)	Prior to the issuance of a permit for the construction of a new Class VI well or the conversion of an existing Class I, Class II, or Class V well to a Class VI well, the owner or operator shall submit, pursuant to 40 CFR 146.91(e), and the Director shall consider the following:	§603607.A	See above.		Text is similar, with no impact on stringency.

500	40 CFR 146.85(a)(4)(i)(C)	Cancellation, termination, or failure to renew may not occur and the financial instrument will remain in full force and effect in the event that on or before the date of expiration: the Director deems the facility abandoned; or the permit is terminated or revoked or a new permit is denied; or closure is ordered by the Director or a U.S. district court or other court of competent jurisdiction; or the owner or operator is named as debtor in a voluntary or involuntary proceeding under Title 11 (Bankruptcy), U.S. Code; or the amount due is paid.	§603609.C.4.c.ii	iii. cancellation, termination, or failure to renew may not occur and the financial instrument will remain in full force and effect in the event that on or before the date of expiration the commissioner deems the facility abandoned; or the permit is terminated or revoked or a new permit is denied; or closure is ordered by the commissioner or a court of competent jurisdiction; or the owner or operator is named as debtor in a voluntary or involuntary proceeding under Title 11 (Bankruptcy), U.S. Code; or the amount due is paid.		Text is similar, with no impact on stringency.
501	40 CFR 146.85(a)(5)	The qualifying financial responsibility instrument(s) must be approved by the Director.	§603609.C.4.d	d. qualifying financial responsibility instruments must be approved by the commissioner.		Text is identical.
502	40 CFR 146.85(a)(5)(i)	The Director shall consider and approve the financial responsibility demonstration for all the phases of the geologic sequestration project prior to issue a Class VI permit (40 CFR 146.82).	§603609.C.4.d.i	i. the commissioner shall consider and approve the financial responsibility demonstration for all the phases of the geologic sequestration project before issuing any authorization to begin geologic sequestration of carbon dioxide in a Class VI well.		Text is similar, with no impact on stringency.
503	40 CFR 146.85(a)(5)(ii)	The owner or operator must provide any updated information related to their financial responsibility instrument(s) on an annual basis and if there are any changes, the Director must evaluate, <del>within a reasonable time</del> , the financial responsibility demonstration to confirm that the instrument(s) used remain adequate for use. The owner or operator must maintain financial responsibility requirements regardless of the status of the Director's review of the financial responsibility demonstration.	§603609.C.4.d.ii	ii. the owner or operator must provide any updated information related to their financial responsibility instrument(s) annually and if there are any changes, the commissioner must evaluate the financial responsibility demonstration to confirm that the instrument(s) used remain adequate. The owner or operator must maintain financial responsibility requirements regardless of the status of the commissioner's review of the financial responsibility demonstration.	The struck-out text of 40 CFR 146.85(a)(5)(ii) will not be adopted.	Text omits "within a reasonable time." No impact on stringency.  August 2020 review: no concerns for stringency.
504	40 CFR 146.85(a)(5)(iii)	The Director may disapprove the use of a financial instrument if he determines that it is not sufficient to meet the requirements of this section.	§603609.C.4.d.iii	iii. the commissioner may disapprove the use of a financial instrument if he determines it is not sufficient to meet the financial responsibility requirements.		Text is similar, with no impact on stringency.
505	40 CFR 146.85(a)(6)	The owner or operator may demonstrate financial responsibility by using one or multiple qualifying financial instruments for specific phases of the geologic sequestration project.	§603609.C.4.e	e. The owner or operator may demonstrate financial responsibility by using one or multiple qualifying financial instruments for specific phases of the geologic sequestration project.		Text is identical.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt "optional" program elements such as authorization by rule.

506	40 CFR 146.85(a)(6)(i)	In the event that the owner or operator combines more than one instrument for a specific geologic sequestration phase (e.g., well plugging), such combination must be limited to instruments that are not based on financial strength or performance (i.e., self-insurance or performance bond), for example trust funds, surety bonds guaranteeing payment into a trust fund, letters of credit, escrow account, and insurance. In this case, it is the combination of mechanisms, rather than the single mechanism, which must provide financial responsibility for an amount at least equal to the current cost estimate.	§603609.C.4.c.i	i. In the event that the owner or operator combines more than one instrument for a specific geologic sequestration phase (e.g., well plugging), such combination must be limited to instruments that are not based on financial strength or performance, for example trust funds, certificates of deposit, surety bonds guaranteeing payment into a trust fund, and letters of credit, escrow account, guaranteeing payment to the Louisiana Office of Conservation upon failure of the Operator to meet permit conditions or obligations under this Chapter. In this case, it is the combination of mechanisms, rather than the single mechanism, which must provide financial responsibility for an amount at least equal to the current cost estimate.	The struck-out text of 40 CFR 146.85(a)(6)(i) will not be adopted. <u>Only instruments such as certificates of deposit, surety bonds, and letters of credit will be acceptable instruments to be used in combination.</u>  <u>The language referencing trust funds and guaranteed payment into a trust fund will not be adopted. As part of the authority granted by La R.S. 30:4(R) and 30:4.1.B.1, the commissioner may require that instruments of financial responsibility be issued in sole favor of the Office of Conservation, thereby averting the need to establish a standby trust for third party instruments.</u>  <u>The following emphasized language has been added: guaranteeing payment to the Louisiana Office of Conservation upon failure of the Operator to meet permit conditions or obligations under this Chapter. Self insurance and third party insurance will not be accepted forms of assurance, and performance bonds are acceptable as a form of surety bonds.</u>	Above regulations do not specifically mention escrow accounts, but they are included here (see 40 CFR 146.85(a)(1)(vi) above).  August 2020 review: EPA legal input requested regarding whether a CD is an acceptable financial instrument. (609C.1.a allows “a certificate of deposit issued in sole favor of the Office of Conservation in a form prescribed by the commissioner...”). Note also that the instruments mentioned under “difference” and the rule text are inconsistent. EPA August Review: Would like LA’s input on their experience with this FA instrument and whether they have found it to be extremely vulnerable in bankruptcies. EPA has found that CDs are less vulnerable when operators are required to fully fund the CD and house it within a standby trust. EPA September Review: EPA considers a CD to be a form of an escrow account. While LA does not allow escrow accounts as a financial instrument, we assume CD’s would be allowed per 40 CFR 146.85(a)(1)(vii) Any other instrument(s) satisfactory to the Director. LA clarified that their draft rule addresses any potential vulnerability by requiring that certificates of deposit be issued, “in sole favor of the Office of Conservation in a form prescribed by the commissioner.” The commissioner has statutory authority to require that financial

State of Louisiana Crosswalk – Class VI Primacy  
March 2020 (Revised February 2021)

						<p>commissioner authority to require that instruments of financial responsibility be issued in sole favor of the Office of Conservation, thereby averting the need to establish a standby trust for third party instruments.</p> <p>Regarding the CDGSTF: The State set a maximum limit of 5 million dollars. LA clarified the CDGSTF is separate from instruments of financial surety required under the commissioner's UIC authority. Its intended uses include funding program administration and covering any activities that may take place after the site is closed and the commissioner has issued a certificate of completion of injection operations (necessary for liability release) in accordance with La R.S. 30:1109. However, as noted in La R.S. 30:1109.A.2, release of liability won't apply to the owner or last operator of record if it turns out that the CDGSTF balance for that site contains inadequate funds to address any issues that arise after the certificate of completion is issued post closure. The \$5,000,000 cap on contributions from a particular operator won't hinder the commissioner in calling required financial surety documents (which again is separate) or from seeking payment into the CDGSTF from the owner/operator of record if the current CDGSTF balance isn't enough to cover something in that post closure period for the facility in question. The maximum</p>

596	40 CFR 146.87(f)	The owner or operator must provide the Director with the opportunity to witness all logging and testing by this subpart. The owner or operator must submit a schedule of such activities to the Director 30 days prior to conducting the first test and submit any changes to the schedule 30 days prior to the next scheduled test.	§ <del>64361</del> 7.B.6	6. The owner or operator must notify the Office of Conservation at least 72 hours before conducting any wireline logs, well tests, or reservoir tests.	While the language at § <del>64361</del> 7.B.6 is not verbatim to 40 CFR 146.87(f), the intent of the federal rule is preserved: that being, prior notification by the well operator of a scheduled field action. Louisiana believes a 72-hour advance notice of a scheduled field activity is sufficient instead of a 30-day notice. § <del>64361</del> 7.B.6 requires a 72 hour notice (for each test) compared to the federal rule, which requires a 30 day notice. § <del>64361</del> 7.B.6 also does not include any requirements for: providing the commissioner with an opportunity to witness the testing and logging or submitting a schedule of activities or revised schedule of activities.  <u>The state's ability to address notices within this shorter time frame will be addressed in the Program Description of the primacy application. The Program Description will also include a description of the work permit request form (Form UIC-17 or successor form) that must be approved by UIC staff prior to start of work per §3621.A.9</u>	72 hour, rather than 30 day, notice may be acceptable if the state has resources to address notices within that time frame. EPA may wish to keep this in mind during the primacy application review, along with a consideration for the amount of witnessing the state plans to perform.  August 2020 review: clarification is noted; no concerns for stringency (this will be addressed in the primacy review).
40 CFR 146.88 Injection well operating requirements.						

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt "optional" program elements such as authorization by rule.

Code of Federal Regulations			Current Louisiana Statutes and Regulations		Difference	Cadmus/EPA Review
Line #	Federal Citation	CFR Text	LA Citation	LA Rule Text		
597	40 CFR 146.88(a)	Except during stimulation, the owner or operator must ensure that injection pressure does not exceed 90 percent of the fracture pressure of the injection zone(s) so as to ensure that the injection does not initiate new fractures or propagate existing fractures in the injection zone(s). In no case may injection pressure initiate fractures in the confining zone(s) or cause the movement of injection or formation fluids that endangers a USDW. Pursuant to requirements at 40 CFR 146.82(a)(9), all stimulation programs must be approved by the Director as part of the permit application and incorporated into the permit.	§ <del>62362</del> 1.A.1	1. Injection Pressure. Except during stimulation, the injection well shall be operated so that the injection-induced pressure in the injection zone(s) does not exceed 90 percent of the fracture pressure of the injection zone(s). This shall ensure that the injection does not initiate new fractures or propagate existing fractures in the injection zone. In no case may injection pressure initiate fractures in the confining zone(s) or cause the movement of injection or formation fluids that endangers a USDW. Pursuant to requirements at § <del>60360</del> 7.C.2.h, all stimulation programs must be approved by the commissioner as part of the permit application and incorporated into the permit.		Text is similar, with no impact on stringency. Recommend making “injection zone” potentially plural (i.e., “injection zone(s)”).  August 2020 review: revision addresses the above comment. No concerns for stringency.
598	40 CFR 146.88(b)	Injection between the outermost casing protecting USDWs and the well bore is prohibited.	§ <del>62362</del> 1.A.2	2. Injection between the outermost casing protecting USDW <del>s</del> and the wellbore is prohibited.		Recommend referring to USDWs (plural) to be inclusive of all USDWs at the site.  August 2020 review: revision addresses the above comment.
599	40 CFR 146.88(c)	The owner or operator must fill the annulus between the tubing and the long string casing with a non-corrosive fluid approved by the Director. The owner or operator must maintain on the annulus a pressure that exceeds the operating injection pressure, unless the Director determines that such requirement might harm the integrity of the well or endanger USDWs.	§ <del>62362</del> 1.A.3 through <del>62362</del> 1.A.4	3. The owner or operator must fill the annulus between the tubing and the long string casing with a non-corrosive fluid <u>approved by the commissioner</u> or a fluid containing a corrosion <del>inhibitor that is approved</del> <u>inhibitor approved</u> by the commissioner. 4. Annulus Pressure. The owner or operator shall maintain a tubing-casing annulus pressure that exceeds the operating injection pressure, unless the commissioner determines that such requirement might harm the integrity of the well or endanger a USDW. A request to operate the well at a reduced annulus pressure must be in writing and approved by the commissioner.	§ <del>62362</del> 1.A.4 provides additional options compared to the federal rule (“a non-corrosive fluid or a fluid containing a corrosion inhibitor” compared to “a non-corrosive fluid”) and does not specify that the fluid must be approved by the commissioner.  Compared to the federal rule, § <del>62362</del> 1.A.4 includes additional specific requirements that any request to operate the well at a reduced annulus pressure must be in writing and approved by the commissioner.	The option of a fluid containing a corrosion inhibitor is appropriate. (Note that LA notes of the difference imply that the non-corrosive fluid does not need to be approved by the commissioner; however the rule requires approval; EPA recommends this remain.)  August 2020 review: revision addresses the above comment; state provision is similar to CFR. No concerns for stringency.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.

<b>628</b>	40 CFR 146.90	The owner or operator of a Class VI well must prepare, maintain, and comply with a testing and monitoring plan to verify that the geologic sequestration project is operating as permitted and is not endangering USDWs. The requirement to maintain and implement an approved plan is directly enforceable regardless of whether the requirement is a condition of the permit. The testing and monitoring plan must be submitted with the permit application, for Director approval, and must include a description of how the owner or operator will meet the requirements of this section, including accessing sites for all necessary monitoring and testing during the life of the project. Testing and monitoring associated with geologic sequestration projects must, at a minimum, include:	<a href="#">§623625.A</a>	A. Testing and Monitoring Requirements. The owner or operator of a Class VI well must prepare, maintain, and comply with a testing and monitoring plan to verify that the geologic sequestration project is operating as permitted and is not endangering USDWs. The requirement to maintain and implement an approved plan is directly enforceable regardless of whether the requirement is a condition of the permit. The testing and monitoring plan must be included with the permit application and must include a description of how the owner or operator will meet these requirements—including accessing sites for all necessary monitoring and testing during the life of the project. Testing and monitoring associated with geologic sequestration projects must include, at a minimum:		Text is similar, with no impact on stringency.
<b>629</b>	40 CFR 146.90(a)	Analysis of the carbon dioxide stream with sufficient frequency to yield data representative of its chemical and physical characteristics;	<a href="#">§623625.A.1</a>	1. analysis of the carbon dioxide stream with sufficient frequency to yield data representative of its chemical and physical characteristics;		Text is identical.
<b>630</b>	40 CFR 146.90(b)	Installation and use, except during well workovers as defined in 40 CFR 146.88(d), of continuous recording devices to monitor injection pressure, rate, and volume; the pressure on the annulus between the tubing and the long string casing; and the annulus fluid volume added;	<a href="#">§623625.A.2</a>	2. installation and use of continuous recording devices to monitor injection pressure, rate, and volume; the pressure on the tubing-casing annulus; and the annulus fluid volume added. Continuous monitoring is not required during well workovers as defined in <a href="#">§623621.A.5</a> ;	While the language at <a href="#">§623625.A.2</a> is not verbatim to 40 CFR 146.90(b), the intent of the federal rule is preserved; that being, installation and use of continuous recording equipment will be required except during well workovers.	Reviewed; no issues found.

\* Section 145.11 does not specify that States must have legal authority to implement the highlighted provisions, but some of these provisions may be necessary to clarify State program requirements. Other highlighted provisions describe applicable requirements if States choose to adopt “optional” program elements such as authorization by rule.
