

**ADDENDUM 03 TO THE
CONTRACT DOCUMENTS**

FOR

**NRDA CAILLOU LAKE HEADLANDS
(TE-100)**

TERREBONNE PARISH, LOUISIANA

**LOUISIANA COASTAL PROTECTION
AND RESTORATION AUTHORITY**

AUGUST 27, 2015

**ADDENDUM 03 TO BID DOCUMENTS
NRDA CAILLOU LAKE HEADLANDS
(TE-100)**

The clarifications and revisions in this addendum supersede the requirements in the Bid Documents dated May 2015. The Successful bidder will be issued a complete revised set of plans and specifications.

1. QUESTIONS SUBMITTED BY THE CONTRACTORS

- 1.1 Question: The vibracore logs within Ship Shoal 88 Borrow Area all make reference to the presence of shell within the borrow materials. However, there is no analysis provided pertaining to the size or percentage concentration of shell within the borrow material samples. The presence of shell can significantly impair dredge pumping performance, particularly on long pipeline lengths.

Please provide the following:

- 1) Detailed analysis of the material samples which would indicate size and percent of shell concentration within the sample.
- 2) Access to the samples for visual inspection.

Answer: All geotechnical information for the borrow area is presented in Appendix G of the Bid Documents. Accordingly, prospective bidders shall form his/her own conclusions based on the information included in Appendix G.

2. REVISIONS TO THE GENERAL PROVISIONS, SPECIAL PROVISIONS, AND TECHNICAL SPECIFICATIONS

Provision/Specification language inclusion and/or revision are shown in italics.

- 2.1 TS-7 CHARACTER OF BORROW SEDIMENT, 7.1 General Description - The entire Specification shall be replaced with the following:

The borrow area sediment for the Project are documented by interpretation of geophysical data including sidescan sonar and seismic subbottom surveys, vibracore samples, and classifications by laboratory tests on samples from the cores. Applicable boring logs are presented in Appendix G. While the borings are representative of subsurface conditions at their respective locations and vertical reaches, local variations in the characteristics of the subsurface materials within the borrow areas are to be expected. Accordingly, prospective bidders shall form his/her own conclusions based on the information included in Appendix G of the Bid Documents. Refer to TS-8.7 and the Plans for borrow area restrictions. The Contractor shall immediately notify the Owner and Engineer of any differing site conditions in accordance with SP-25.

END OF ADDENDUM 03
